Research, Science & Technology

Foundation for Research, Science, and Technology Act 1990

Notice of Changes to Ministerial Scheme Under Section 8A of the Foundation for Research, Science, and Technology Act 1990—the TechLink Scheme

Direction to: The Foundation for Research, Science and Technology (“the foundation”).

Under section 8A of the Foundation for Research, Science, and Technology Act 1990, I direct the foundation to allocate funds in accordance with the TechLink Scheme (“the scheme”) specified in this notice.

This notice revokes and replaces the notice published in the *New Zealand Gazette*, 6 July 2000, page 1814, which established the TechLink programme within the Technology New Zealand Scheme.

Nature of the Scheme

The scheme is intended to create awareness of, and facilitate access to, technology and technological capabilities that are new to firms¹.

The intended outcome of the scheme is an increased awareness and understanding of the value that technological innovation can deliver to their businesses.

The scheme should target all firms, with an emphasis on small and medium sized firms².

Objectives of the Scheme

The objectives of the scheme are to:

- increase the awareness of, understanding of, and access to new technology and technological capabilities critical to successful firms now and in the future;
- provide firms with access to and information about public and private suppliers of technology, and

technology services, within New Zealand and overseas; and

- reduce transaction cost barriers associated with providing:
 - technology appraisal services to small and medium sized firms; and
 - access to new technology and to sources of guidance and assistance to firms commencing technology based projects.

Mechanisms of Support for the Scheme

The foundation will allocate funds to support projects that meet the scheme’s objectives. These funds can be allocated to a firm (or a group of firms). The foundation may require a firm(s) to fund up to 50% of the project costs. The project should be aimed at increasing awareness and understanding, by firms, of the value that technological innovation can deliver to that firm or other firms.

The scheme will target support to those projects that, in the foundation’s view, best meet the following criterion:

- Have the potential to create awareness of, and facilitate access to, technology or technological capabilities that are new to the firm(s).

The foundation will have full discretion to manage the allocation of funds for the scheme in a way that achieves the outcome and objectives of the scheme. The type of projects that could be supported may include, but are not limited to, the following examples:

- Publication, promotion and pro-active delivery of technology success stories and case studies on a national and a regional basis; or
- delivery of technology information and advisory services (including planning) to firms commencing technology-based projects; or
- facilitating networks of firms based around technology or with the potential to do so; or
- assist collectives³ entities in identifying and evaluating through technical means, the commercial opportunities provided by the entities’ access or rights to:
 - land or related assets that cannot be used as collateral for bank loans;
 - special land feature or qualities of the land or related assets; and
 - indigenous resources, including native flora and fauna, traditional knowledge and customary rights;
 and to use scientific evidence to assist the entity in determining which commercial opportunity to pursue; and
- encourage collectives into high-tech, high value-added processing, through fostering their research, science and technology capability and capacity to absorb and make use of advanced knowledge.

Funding to be Allocated

Funds available for the scheme will be published each year in the estimates of appropriations.

The foundation will have the discretion to allocate up to 10% of funding for this scheme:

- to the Technology for Business Growth scheme or the Technology for Industry Fellowship Scheme; or
- between the Technology for Business Growth Scheme and the Technology for Industry Fellowship Scheme

if all schemes involved in the allocation are appropriated within the same non departmental output class under the Public Finance Act 1989.

The Minister of Research, Science and Technology’s written approval is required before the foundation can allocate 10% or more than 10% of the scheme to any other scheme issued by the Minister of Research, Science and Technology under

section 8A of the Foundation for Research, Science, and Technology Act 1990.

Period of Operation

The scheme will commence operation on 1 August 2004 and is estimated to continue for a period of five years from 1 August 2004.

Monitoring Agency

Monitoring of the scheme, including implementation of this notice by the Foundation for Research, Science and Technology and the extent to which the scheme achieves its stated objectives, will be carried out by the Ministry of Research, Science and Technology.

Dated at Wellington this 23rd of August 2004.

PETE HODGSON, Minister of Research, Science and Technology.

Notes

¹A firm is defined as a body corporate or other entity that has a legal personality or existence distinct from those of its members (including sole traders) and is resident in New Zealand. For the purposes of this scheme, a firm excludes any Crown owned body corporate or other entity (including but not limited to those that are governed by the Education Act 1989, or the Local Government Act 1974 or the Crown Research Institutes Act 1992).

²A small and medium sized firm is defined as a firm that has annual turnover of up to and including \$50 million.

³A collectives entity is any legal entity that has a legal personality or existence distinct from those of its members, is resident in New Zealand, and the primary function of which is to use land or related assets whose ownership structure is such that they cannot be used as collateral for bank loans.

Notice of Introduction of a Ministerial Scheme Under Section 8A of the Foundation for Research, Science, and Technology Act 1990—the International Investment Opportunities Fund

Direction to: The Foundation for Research, Science and Technology (“the foundation”).

Under section 8A of the Foundation for Research, Science, and Technology Act 1990, I direct the foundation to allocate funds in accordance with the International Investment Opportunities Fund (“the scheme”) specified in this notice.

Nature of the Scheme

The intended outcome of this scheme is to increase the ability of New Zealand researchers to participate in research collaborations that attract international co-funding, to recruit highly experienced researchers from overseas and to support participation in international research programmes with a high relevance to New Zealand’s economic, social and/or environmental development.

The scheme will be used to secure benefits for New Zealand in terms of research funding, access to equipment or technologies not available in New Zealand and ensuring advanced skills are matched to areas of strong growth.

The foundation will work with the Health Research Council of New Zealand (HRC) and the Ministry of Research, Science and Technology to develop and implement priorities, and work with the HRC to invest the fund each year. The scheme will give priority to opportunities involving bilateral partners identified in the Government’s Research, Science & Technology International Linkages Strategy.

Scheme Objectives

Projects that meet the scheme’s objectives are eligible to receive funds from the foundation.

The scheme’s objectives are:

- **Objective One:** To provide funding to enable New Zealand researchers to respond to out-of cycle

opportunities to gain access to international research programmes and associated funding streams;

- **Objective Two:** To establish joint funding pools with other countries to facilitate research programmes of joint interest; and
- **Objective Three:** To assist world-leading researchers, working in key areas of strategic interest to New Zealand, to relocate to New Zealand and establish a research team.

In making funding decisions, the foundation will fund those programmes that, in its view, best meet the following criteria:

- Scientific and technological quality; and
- potential benefit to New Zealand; including the ability to utilise overseas expertise and advances in science and technology, and the contribution to New Zealand’s research, science and technology goals.

Operating Principles

In running the fund, the foundation will:

- seek commitment from the research institutions submitting proposals to provide infrastructural support and organisational co-funding for successful projects;
- seek to leverage New Zealand funding to ensure the best outcomes for New Zealand research and researchers;
- seek to ensure benefit to New Zealand is captured for the wealth and wellbeing of New Zealanders; and
- ensure the process is flexible and responsive to opportunity.

The Mechanism

The scheme has three separate but interlinked objectives—

Objective One of the scheme is intended to provide a mechanism for New Zealand researchers to gain entry into overseas research programmes and funds that, due to timing, would not otherwise occur as part of the standard investment cycle. The funds under this objective should be invested contestably and sufficiently frequently to meet out-of cycle opportunities.

Funds will be provided by the international investment opportunities fund to meet the following needs:

- Providing seeding or bridging funding to underwrite the New Zealand share of the costs of a joint research proposal with international partners, until these can be accommodated within normal funding cycles.

Under Objective Two, funds will be provided for New Zealand research purchase agencies to establish a diversity of joint funding pools with overseas funders, including:

- developing research opportunities for New Zealand in strategic partnership with overseas funding agencies; and
- investing in targeted research capacity development initiatives in partnership with overseas funding agencies.

Objective Two will be administered on a contestable basis and aim to encourage a range of partnerships.

Under Objective Three, funds may be provided to assist world-leading researchers, working in areas of strategic interest to New Zealand, to relocate to New Zealand. Costs covered by this objective may include:

- relocation costs;
- research funding until a researcher can be accommodated within normal funding cycles; and
- salary costs.

Objective Three requires co-funding and support from a host institution.

Allocation of Funding

Funds available to the scheme will be published each year in the estimates of appropriations.

Period of Operation

The scheme commenced operation on 1 September 2004. Its continuation and mode of operation will be reviewed after two years.

Monitoring Agency

Monitoring and review of the scheme, including of the implementation of this Ministerial notice by the foundation and the extent to which the scheme achieves its stated objectives, will be carried out by the Ministry of Research, Science and Technology.

Dated this 23rd day of August 2004.

PETE HODGSON, Minister of Research, Science and Technology.

Notice of Changes to Ministerial Scheme Under Section 8A of the Foundation for Research, Science, and Technology Act 1990—the Technology for Industry Fellowships Scheme

Direction to: The Foundation for Research, Science and Technology (“the foundation”).

Under section 8A of the Foundation for Research, Science, and Technology Act 1990, I direct the foundation to expand the Technology for Industry Fellowship Scheme (“the scheme”), as specified in this notice, which revokes and replaces the notice published in the *New Zealand Gazette*, 6 July 2000, page 1815, that last amended the scheme.

Nature of the Scheme

The scheme supports science and technology-based projects that develop individuals’ skills and knowledge in commercial research and development environments.

The outcome should be an enhanced level of scientific and technology-based human capital in participating firms¹.

The scheme will target all firms.

Objectives of the Scheme

The expanded scheme will support firms by one or more of the following objectives:

- Creating new research, science and technological capabilities within New Zealand firms.
- Building research and development (R&D) absorptive capacity within New Zealand firms.
- Fostering connections between New Zealand firms and existing research providers² (both public and private).
- Improving researchers’ understanding of the business environment within which R&D is undertaken (and vice versa).
- Developing individuals’ skills and knowledge of commercially focused R&D environments.
- Increase the chances of business success through the appropriate use of expert assistance.

Mechanisms of Support

The foundation will use the scheme to allocate funds to:

- provide salary support for the secondment of individuals between a firm and a research provider to undertake a commercially-focused science or technology project, management of an R&D project, or commercialisation of an R&D project³;

- provide support for the placement of individuals within firms or research providers to cover senior undergraduates, postgraduates, recent graduates, recent immigrants and experts to undertake a commercially-focused science or technology project, management of an R&D project, or commercialisation of an R&D project; or
- provide a stipend for an individual to undertake a commercially-focused science or technology project, or an R&D commercialisation project; while undertaking a postgraduate tertiary qualification.

The foundation may require a firm(s) to fund up to 50% of the project costs. More projects may meet the scheme’s objectives than there are funds available. The foundation will fund those projects that, in its view, best meet the following criteria:

- They are supported by a firm(s) and, where necessary, are supported by an appropriate research provider; and
- the fellows will be of at least undergraduate level working towards a tertiary qualification, or be qualified in the fields of science, engineering, technology, R&D project management or R&D commercialisation, relevant to the project.

The foundation will have full discretion to manage the allocation of funds for the scheme in a way that achieves the outcome and objective of the scheme.

Funding to be Allocated

Funds available for the scheme will be published each year in the estimations of appropriations.

The foundation will have the discretion to allocate up to 10% of funding for this scheme to the TechLink Scheme, the Technology for Business Growth Scheme or the Grants for Private Sector Research and Development Scheme, provided all schemes involved in the allocation are appropriated within the same non departmental output class under the Public Finance Act 1989.

The Minister of Research, Science and Technology’s written approval is required before the foundation can allocate 10% or more of the scheme to any other scheme issued by the Minister of Research, Science and Technology under section 8A of the Foundation for Research, Science, and Technology Act 1990.

Period of Operation

The expanded scheme will commence on 1 July 2004 and it is anticipated to continue for a period of five years.

Monitoring Agency

The Ministry of Research, Science and Technology will monitor the scheme, including implementation of this Ministerial notice by the Foundation for Research, Science and Technology, and the extent to which the scheme achieves its stated objectives.

Dated at Wellington this 28th day of August 2004.

PETE HODGSON, Minister of Research, Science and Technology.

Notes

¹A firm is defined as a body corporate or other entity that has a legal personality or existence distinct from those of its members (including sole traders) and is resident in New Zealand.

²A research provider is defined as a public or privately owned organisation whose activity is scientific and technology-based research and experimental development.

³R&D project management and R&D commercialisation projects are to target R&D gaps, and may include experimental, and production development and intellectual property management. This extended scope does not extend to the management of non-technical projects, market assessments and developing market strategies etc.

- (i) to lay and maintain a water culvert in and under the soil of the easement land;

1.6 Nothing in the foregoing sub-clause 1.5 shall prevent the parties from using alternative dispute resolution procedures as an alternative to arbitration, should this be mutually agreed.
