

# New Zealand Gazette

OF THURSDAY, 20 JUNE 2002

---

WELLINGTON: THURSDAY, 20 JUNE 2002 — ISSUE NO. 68

---

Australia New Zealand  
Food Authority

Amendment No. 60  
to the  
Food Standards Code

**AUSTRALIA NEW ZEALAND FOOD AUTHORITY**  
**VARIATIONS TO THE *FOOD STANDARDS CODE***  
**(AMENDMENT No. 60)**

**1. Preamble**

The variations set forth in the Schedule below are variations to the *Food Standards Code* (hereinafter called 'the Code') which was published by the National Health and Medical Research Council in the *Commonwealth of Australia Gazette*, No. P 27, on 27 August 1987, and which has been varied from time to time.

The Schedule contains variations adopted by the Australia New Zealand Food Standards Council in April and May 2002.

These variations are published pursuant to section 32 of the *Australia New Zealand Food Authority Act 1991*.

**2. Citation**

These variations may be collectively known as *Amendment No. 60* to the Code.

**3. Commencement**

These variations commence on the date of gazettal.

**4. Correction of Typographical Error**

Amendment 59 published on 9 May 2002 contained the following typographical error -

- On page 5 (Item [3.1]) - under the definition for 'technological function', the second last and last lines should read 'manner which suggests that the organoleptic qualities have not been altered, other than through the process.'
- On page 6 (Item [3.5]) - clause 11(a)(iii) should read 'United States *Code of Federal Regulations*, 1996, 21 CFR Part 172.515; or'.

## SCHEDULE

[1] *Standard A1 is varied by omitting the Editorial Notes immediately after the Table to subclause 19(e), substituting –*

### Editorial Notes:

(1) Subclauses (e), (f), (g), (h) and (i) implement a pilot trial of a management system for health claims. The outcomes of the pilot will be used to assist in the evaluation of a proposal to allow wider use of health claims in food labels and advertisements.

(2) Due to anticipated delays in the publication of amendments into the Food Standards Code, the approved foods/products listed in Column 1 to subclause (e) are also listed in a Register which is held at and by the Australia New Zealand Food Authority. The Register contains the most up to date list of approved foods/products.

(3) Clause (13) of Standard A1 should be read in conjunction with Standard A9 – Vitamins and Minerals.

[2] *Standard A11 is varied by -*

[2.2] *inserting in the Schedule into Column 1 and Column 2 respectively, immediately after the entry for Anthocyanins –*

Arachidonic acid (ARA)–rich oil derived from the fungus <i>Mortierella alpina</i>	Addendum 18
---	-------------

[2.2] *inserting in the Schedule into Column 1 and Column 2 respectively, immediately after the entry for Divinylbenzene copolymer –*

Docosahexaenoic acid (DHA)–rich dried marine micro -algae ( <i>Schizochytrium</i> sp.)	Addendum 14
Docosahexaenoic acid (DHA)–rich oil derived from marine micro -algae ( <i>Schizochytrium</i> sp.)	Addendum 15
Docosahexaenoic acid (DHA) – rich oil derived from the algae <i>Cryptocodinium cohnii</i>	Addendum 17

[2.3] *inserting in the Schedule into Column 1 and Column 2 respectively, immediately after the entry for Talc -*

Tall oil phytosterols	Addendum 16
-----------------------	-------------

[2.4] *inserting, immediately after ADDENDUM 13 –*

**ADDENDUM 14****SPECIFICATION FOR DOCOSAHEXAENOIC ACID (DHA) – RICH DRIED MARINE MICRO-ALGAE (*SCHIZOCHYTRIUM* SP.)**

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA)
Appearance	Free flowing coarse powder
Colour	Golden (yellow to light orange)
Odour	Slight marine
Solids (%)	min. 95.0
Crude oil (%)	min. 37.0
DHA (%)	min. 15.0
Peroxide value (meq/kg)	max. 10.0
Ash (%)	max. 12
Sodium (%)	max. 3
Heavy metals (ppm) (as Pb)	max. 20
Lead (ppm)	max. 2
Arsenic (ppm)	max. 1

**Microbiological**

Total count (cfu/g)	max. 10,000
Yeast (cfu/g)	max. 300
Mould (cfu/g)	max. 300
E. coli	Negative to test
Salmonella	Negative to test

**ADDENDUM 15****SPECIFICATION FOR DOCOSAHEXAENOIC ACID (DHA) – RICH OIL DERIVED FROM MARINE MICRO-ALGAE (*SCHIZOCHYTRIUM* SP.)**

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA)
Appearance	Free flowing oil
Colour	Pale light yellow to orange
Odour	Characteristic bland to fish-like
DHA (%)	min. 32    max. 45
Tetradecanoic acid 14:0 (%)	min. 5    max. 11
Hexadecanoic acid 16:0 (%)	min. 18    max. 25
Eicosapentaenoic acid 20:5n-3 (%)	min. 0.5    max. 4
Docosapentaenoic acid 22:5n-6 (%)	min. 10    max. 20
Peroxide value (meq/kg)	max. 10
Moisture and volatiles (%)	max. 0.10
Non-saponifiables (%)	max. 4.5
Trans fatty acids (%)	max. 2.0
Free fatty acid	max. 0.25
Lead (ppm)	max. 0.2
Arsenic (ppm)	max. 0.2
Copper (ppm)	max. 0.05
Iron (ppm)	max. 0.25

Mercury (ppm)	max. 0.2
Hexane (ppm)	max. 20

**ADDENDUM 16****SPECIFICATION FOR TALL OIL PHYTOSTEROLS DERIVED FROM TALL OILS**

Tall oil phytosterols (non-esterified) are derived from tall oil soap, a by-product of the pulping process, and then purified.

Total phytosterol/phytostanol content (%)	min.	95.0
Loss on drying (water (%))	max.	5.0
Solvents (%)	max.	0.5
Residue on ignition (%)	max.	0.1
Total heavy metals (ppm)	max.	10
Cadmium (ppm)	max.	1.0
Mercury (ppm)	max.	1.0
Arsenic (ppm)	max.	2.0
Lead (ppm)	max.	0.25
Total aerobic count (CFU/g)	max.	10,000
Combined moulds and yeasts (CFU/g)	max.	100
Coliforms	Negative to test	
E. coli	Negative to test	
Salmonella	Negative to test	

Major Sterol profile (%) as below -

Campesterol	min.	4.0	max.	25.0
Campestanol	min.	0.0	max.	14.0
$\beta$ -Sitosterol	min.	36.0	max.	79.0
$\beta$ -Sitostanol	min.	6.0	max.	34

**ADDENDUM 17****SPECIFICATION FOR DOCOSAHEXAENOIC ACID (DHA) - RICH OIL DERIVED FROM THE ALGAE *CRYPTHECODINIUM COHNII***

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3)		
Appearance	Free flowing oil		
Colour	Yellow to orange		
Odour	Characteristic		
DHA (%)	min. 40	max. 45	
Dodecanoic acid 12:0 (%)	min. 0	max. 6	
Tetradecanoic acid 14:0 (%)	min. 10	max. 20	
Hexadecanoic acid 16:0 (%)	min. 10	max. 20	
Octadecenoic acid 18:1 (%)	min. 10	max. 30	
Peroxide value (meq/kg)	max. 5		
Moisture and volatiles (%)	max. 0.01		
Non-saponifiables (%)	max. 3.5		
Trans fatty acids (%)	max. 1.0		
Free fatty acid (%)	max. 0.4		

Lead (ppm)	max. 0.2
Arsenic (ppm)	max. 0.5
Copper (ppm)	max. 0.1
Iron (ppm)	max. 0.5
Mercury (ppm)	max. 0.2
Hexane (ppm)	max. 0.3

### ADDENDUM 18

#### SPECIFICATIONS FOR ARACHIDONIC ACID (ARA) – RICH OIL DERIVED FROM THE FUNGUS *MORTIERELLA ALPINA*

Full chemical name for ARA	5,8,11,14-eicosatetraenoic acid (20:4n-6)	
Appearance	Free flowing oil	
Colour	Yellow	
Odour	Characteristic	
ARA (%)	min. 38	max. 44
Hexadecanoic acid 16:0 (%)	min. 3	max. 15
Octadecanoic acid 18:0 (%)	min. 5	max. 20
Octadecenoic acid 18:1 (%)	min. 5	max. 38
Octadecadienoic acid 18:2 (%)	min. 4	max. 15
Peroxide value (meq/kg)	max. 5	
Moisture and volatiles (%)	max. 0.05	
Non-saponifiables (%)	max. 3.5	
Trans fatty acids (%)	max. 1.0	
Free fatty acid (%)	max. 0.4	
Lead (ppm)	max. 0.2	
Arsenic (ppm)	max. 0.5	
Copper (ppm)	max. 0.1	
Iron (ppm)	max. 0.5	
Mercury (ppm)	max. 0.2	
Hexane (ppm)	max. 0.3	

[3] *Standard A14 is varied by -*

[3.1] *inserting in clause 2, immediately following the definition for food -*

**‘Schedule 1’** means Schedule 1 and Schedule 2 in Standard 1.4.2 in Volume 2.

**‘Schedule 2’** means Schedule 3 in Standard 1.4.2 in Volume 2.

**‘Schedule 3’** means Schedule 4 in Standard 1.4.2 in Volume 2.

[3.2] *omitting subclause 3(3), substituting -*

(3) The limits for pesticides in drinking water are listed under 'Pesticides' in Chapter 3 of the *Australian Drinking Water Guidelines* (1996) NHMRC - ARMCANZ (National Health and Medical Research Council - Agriculture and Resource Management Council of Australia and New Zealand).

**Editorial note:**

The *Australian Drinking Water Guidelines* (1996) are available on the Internet at [www.nhmrc.gov.au/advice/publications](http://www.nhmrc.gov.au/advice/publications).

[3.3] *omitting* Schedule 1, Schedule 2 *and* Schedule 3.

[4] **Standard A16** is varied by *omitting* Footnote 9 to Table IV - Enzymes, Group III - Microbial Origin, *substituting* -

<sup>9</sup> Lipase may be produced from a genetically manipulated strain of *Aspergillus oryzae* containing the gene for lipase isolated from (i) *Humicola lanuginosa* and inserted by plasmids pBoel1960 and p3SR2 or (ii) *Rhizomucor miehei* or (iii) *Fusarium oxysporum*.

[5] **Standard A18** is varied by *inserting into* Column 1 of the Table to clause 2, *immediately after the last occurring entry* -

Food derived from glyphosate-tolerant corn line  
NK603

[6] **Standard A19** is varied by -

[6.1] *inserting in the* Table to clause 2, *into* Column 1 *and* Column 2 *respectively* -

Docosahexaenoic acid (DHA) – rich dried marine micro-algae ( <i>Schizochytrium</i> sp.)	May only be added to food according to Standard A11.
Docosahexaenoic acid (DHA) – rich oil derived from marine micro-algae ( <i>Schizochytrium</i> sp.)	May only be added to food according to Standard A11
Tall oil phytosterols	<p>May only be added to food -</p> <p>(1) according to Standard G2 or G5 and Standard A11; and</p> <p>(2) where the total fatty acid present in the food is not more than 280 g/kg of saturated fatty acids.</p> <p>The name ‘tall oil phytosterols’ or ‘plant sterols’ must be used when declaring the ingredient in the ingredient list, as prescribed in clause 5 of Standard A1.</p> <p>The label on or attached to a package of food containing tall oil phytosterols must include statements to the effect that -</p> <ol style="list-style-type: none"> <li>1. the product should be consumed in moderation as part of a diet low in saturated fats and high in fruit and vegetables;</li> <li>2. the product is not recommended for infants, children and pregnant or lactating women unless under medical supervision; and</li> <li>3. consumers on cholesterol-lowering medication should seek medical advice on the use of this product in conjunction with their medication.</li> </ol>

[6.2] *inserting immediately after the Table to clause 2 -*

**Editorial note:**

The Table to clause 2 contains conditions relating to novel foods. Nothing contained in this Code permits the mixing of phytosterol esters and tall oil phytosterols.

[7] *Standard G2 is varied by omitting subparagraph (1)(b)(ii)(J), substituting -*

(J) not more than 137 g/kg of phytosterol esters; or

(K) not more than 80 g/kg of tall oil phytosterols.

[8] *Standard G5 is varied by omitting paragraph 2(3)(o), substituting -*

(o) not more than 137 g/kg of phytosterol esters; or

(p) not more than 80 g/kg of tall oil phytosterols.

[9] **Table of Contents for Volume 2** is varied by -

[9.1] *omitting the heading Standard 1.2.3 Mandatory Advisory Statements and Declarations, substituting -*

Standard 1.2.3                      Mandatory Warning and Advisory Statements and Declarations

[10] *omitting the following -*

Standard 2.9.1    Reserved (Infant Formula Products)

*substituting -*

Standard 2.9.1    Infant Formula Products

[11] *Standard 1.1.1 is varied by -*

[11.1] *inserting in clause 2 after the definition for business address -*

**category of ingredients** means ingredients declared in the statement of ingredients using a generic name set out in the Table to Clause 4 of Standard 1.2.4.

[11.2] *omitting from clause 2, in the definition for warning statement subclause (d) -*

*substituting*

(d) subclauses 14(1), 14(3) and 26(1) of Standard 2.9.1; and

[11.3] *omitting paragraph (e) in the definition of warning statement in Clause 2, substituting -*

(e) paragraph 5(3)(c) and subclause 6(2) of Standard 2.9.2; and

[12] *Standard 1.1.3 is varied by –*

[12.1] *omitting the Editorial notes immediately after the Table to subclause 1(5), substituting –*

**Editorial note:**

- (1) Subclauses (5), (6), (7), (8) and (9) implement a pilot trial of a management system for health claims. The outcomes of the pilot will be used to assist in the evaluation of a proposal to allow wider use of health claims in food labels and advertisements.
- (2) The Australia New Zealand Food Authority maintains a Register which contains the most up to date list of approved foods/products for the folate pilot.
- (3) Standard 1.2.8 – Nutrition Labelling and Standard 1.3.2 – Vitamins and Minerals should be read in conjunction with clause 1 of this Standard.

[12.2] *inserting immediately after subclause 1(9) –*

(10) Subclauses (5), (6), (7), (8) and (9) cease to have effect on –

- (a) 13 February 2004; or
- (b) the commencement of Standard 1.1A.2;

whichever occurs sooner.

[12.3] *omitting from subclause 3(7) the definition for reduced-fat milk, substituting –*

**reduced-fat milk** means –

- (a) milk from which milk fat or cream has been partially removed; or
- (b) a mixture of non-fat milk with milk or standard milk; or
- (c) the product produced from a combination of the products specified in subparagraphs (a) and (b).

[12.4] *omitting from subclause 3(7) the definition for standardised milk, substituting –*

**standardised milk** means pasteurised or ultra heat treated milk –

- (a) from which no substance has been removed except milk fat or cream; and
- (b) to which no substance has been added except non-fat milk or non-fat milk solids.

[13] *Standard 1.2.3 is varied by inserting in the Table to clause 2, into Column 1 and Column 2 respectively -*

Food regulated in Standard 2.4.2 containing tall oil phytosterols .	<p>Statements to the effect that -</p> <ol style="list-style-type: none"> <li>1. the product should be consumed in moderation as part of a diet low in saturated fats and high in fruit and vegetables;</li> <li>2. the product is not recommended for infants, children and pregnant or lactating women unless under medical supervision; and</li> <li>3. consumers on cholesterol-lowering medication should seek medical advice on the use of this product in conjunction with their medication.</li> </ol>
---	--

[14] *Standard 1.2.4 is varied by –*

[14.1] *omitting from the Editorial note to Clause 4 the reference to –*

Table to Clause 5

*substituting –*

Table to Clause 4

[14.2] *omitting from Schedule 2, Part 1 Food Additive Code Numbers (alphabetical order) –*

Aluminium calcium, sodium, magnesium, potassium and ammonium salts of fatty acids	470
---	-----

*substituting*

Aluminium, calcium, sodium, magnesium, potassium and ammonium salts of fatty acids	470
--	-----

[14.3] *omitting from Schedule 2, Part 1 Food Additive Code Numbers (alphabetical order) –*

Glycerin or glycerol	442
----------------------	-----

*substituting*

Glycerin or glycerol	422
----------------------	-----

[14.4] *omitting from Schedule 2, Part 2 Food Additive Code Numbers (numerical order) –*

Aluminium calcium, sodium, magnesium, potassium and ammonium salts of fatty acids	470
---	-----

*substituting*

Aluminium, calcium, sodium, magnesium, potassium and ammonium salts of fatty acids	470
--	-----

[14.5] *omitting from* Schedule 2, Part 2 Food Additive Code Numbers (numerical order) –

Glycerin or glycerol	442
----------------------	-----

[14.6] *inserting in* Schedule 2, Part 2 Food Additive Code Numbers (numerical order) *after the entry for* Mannitol 421 –

Glycerin or glycerol	422
----------------------	-----

[15] **Standard 1.2.10** is varied by *omitting the definition for* category of ingredients from Clause 1 Interpretation.

[16] **Standard 1.3.1** of Volume 2 is varied by –

[16.1] *omitting the heading for* Schedule 1, *substituting* –

## SCHEDULE 1

### Permitted uses of food additives by food type

[16.2] *omitting from* Schedule 1 item 10.2 Liquid egg products –

1505	Triethyl citrate	12500	mg/kg	liquid white only
------	------------------	-------	-------	-------------------

*substituting*

1505	Triethyl citrate	1250	mg/kg	liquid white only
------	------------------	------	-------	-------------------

[16.3] *omitting from* Schedule 1 item 0.1 *the heading* –

### renneting enzymes

*substituting*

### renneting enzymes

[16.4] *inserting in* Schedule 1 item 4.1 Unprocessed fruits and vegetables *after the entry for* grapes packed with permeable envelopes –

### Longans

220 221 222	Sulphur dioxide and sodium and	10	mg/kg
223 224 225	potassium sulphites		
228			

[16.5] *inserting in* Schedule 1 item 4.3.1 *after the heading* Dried fruits and vegetables\* –

200 201 202 203	Sorbic acid and sodium, potassium	1000	mg/kg
	and calcium sorbates		

[16.6] *inserting in* Schedule 1 item 5 Confectionery *after the entry for* Alitame –

-	Neotame	300	mg/kg
---	---------	-----	-------

[16.7] *omitting from Schedule 1 item 11.4 Tabletop sweeteners\* –*

951	Aspartame	GMP	note – duplication of schedule 2
955	Sucralose	GMP	note – duplication of schedule 2

[16.8] *omitting from Schedule 1 item 14.1.2.2 the heading low joule fruit and vegetable products, substituting –*

**low joule fruit and vegetable juice products**

[17] *Standard 1.3.2 is varied by omitting the Example to subclause 9(3), substituting –*

**EXAMPLE**

NUTRITION INFORMATION		
Servings per package: 20		
Serving size: 50 mL		
	Quantity per Serving	Quantity per 100g (or 100 mL)
Energy	86 kJ	172 kJ
Protein	LESS THAN 1 g	LESS THAN 1 g
Fat, total	LESS THAN 1 g	LESS THAN 1 g
- saturated	LESS THAN 1 g	LESS THAN 1 g
Carbohydrate	5 g	10 g
- sugars	5 g	10 g
Sodium	LESS THAN 5 mg	LESS THAN 5 mg
Vitamin C	10 mg (25% RDI)	20 mg
Manganese	1 mg	2 mg

[18] *Standard 1.3.3 is varied by deleting the entry for Lipase, triacylglycerol EC [3.1.1.3] and corresponding sources from the Table to clause 17, substituting –*

Lipase, triacylglycerol EC [3.1.1.3]	<i>Aspergillus niger</i> <i>Aspergillus oryzae</i> <i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Fusarium oxysporum</i> <i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Humicola lanuginosa</i> <i>Aspergillus oryzae</i> , containing the gene for Lipase, triacylglycerol isolated from <i>Rhizomucor miehei</i> <i>Rhizopus arrhizus</i> <i>Rhizomucor miehei</i> <i>Rhizophus niveus</i> <i>Rhizophus oryzae</i>
---	---

[19] *Standard 1.3.4 is varied by inserting in the Schedule after the last occurring specification –*

**Specification for docosahexaenoic acid (DHA) – rich dried marine micro-algae (*Schizochytrium* sp.)**

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA)
Appearance	Free flowing coarse powder
Colour	Golden (yellow to light orange)
Odour	Slight marine
Solids (%)	min. 95.0
Crude oil (%)	min. 37.0
DHA (%)	min. 15.0
Peroxide value (meq/kg)	max. 10.0
Ash (%)	max. 12
Sodium (%)	max. 3
Heavy metals (ppm) (as Pb)	max. 20
Lead (ppm)	max. 2
Arsenic (ppm)	max. 1

**Microbiological**

Total count (cfu/g)	max. 10,000
Yeast (cfu/g)	max. 300
Mould (cfu/g)	max. 300
E. coli	Negative to test
Salmonella	Negative to test

**Specification for docosahexaenoic acid (DHA) – rich oil derived from marine micro-algae (*Schizochytrium* sp.)**

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3 DHA)
Appearance	Free flowing oil
Colour	Pale light yellow to orange
Odour	Characteristic bland to fish-like
DHA (%)	min. 32      max. 45
Tetradecanoic acid 14:0 (%)	min. 5      max. 11
Hexadecanoic acid 16:0 (%)	min. 18      max. 25
Eicosapentaenoic acid 20:5n-3 (%)	min. 0.5      max. 4
Docosapentaenoic acid 22:5n-6 (%)	min. 10      max. 20
Peroxide value (meq/kg)	max. 10
Moisture and volatiles (%)	max. 0.10
Non-saponifiables (%)	max. 4.5
Trans fatty acids (%)	max. 2.0
Free fatty acid	max. 0.25
Lead (ppm)	max. 0.2
Arsenic (ppm)	max. 0.2
Copper (ppm)	max. 0.05
Iron (ppm)	max. 0.25
Mercury (ppm)	max. 0.2
Hexane (ppm)	max. 20

### Specification for tall oil phytosterols derived from tall oils

Tall oil phytosterols (non-esterified) are derived from tall oil soap, a by-product of the pulping process and then purified.

Total Phytosterol/phytostanol content (%)	min.	95
Loss on drying (water (%))	max.	5.0
Solvents (%)	max.	0.5
Residue on ignition (%)	max.	0.1
Total Heavy metals (ppm)	max.	10
Cadmium (ppm)	max.	1.0
Mercury (ppm)	max.	1.0
Arsenic (ppm)	max.	2.0
Lead (ppm)	max.	0.25
Total aerobic count (CFU/g)	max.	10,000
Combined moulds and yeasts (CFU/g)	max.	100
Coliforms	Negative to test	
E. coli	Negative to test	
Salmonella	Negative to test	

Major Sterol profile (%) as below -

Campesterol	min.	4.0	max.	25.0
Campestanol	min.	0.0	max.	14.0
$\beta$ -Sitosterol	min.	36.0	max.	79.0
$\beta$ -Sitostanol	min.	6.0	max.	34

### Specification for docosahexaenoic acid (DHA) – rich oil derived from the algae *Crypthecodinium cohnii*

Full chemical name for DHA	4,7,10,13,16,19-docosahexaenoic acid (22:6n-3)	
Appearance	Free flowing oil	
Colour	Yellow to orange	
Odour	Characteristic	
DHA (%)	min. 40	max. 45
Dodecanoic acid 12:0 (%)	min. 0	max. 6
Tetradecanoic acid 14:0 (%)	min. 10	max. 20
Hexadecanoic acid 16:0 (%)	min. 10	max. 20
Octadecenoic acid 18:1 (%)	min. 10	max. 30
Peroxide value (meq/kg)	max. 5	
Moisture and volatiles (%)	max. 0.01	
Non-saponifiables (%)	max. 3.5	
Trans fatty acids (%)	max. 1.0	
Free fatty acid (%)	max. 0.4	
Lead (ppm)	max. 0.2	
Arsenic (ppm)	max. 0.5	
Copper (ppm)	max. 0.1	
Iron (ppm)	max. 0.5	
Mercury (ppm)	max. 0.2	
Hexane (ppm)	max. 0.3	

**Specification for arachidonic acid (ARA) – rich oil derived from the fungus *Mortierella alpina***

Full chemical name for ARA	5,8,11,14-eicosatetraenoic acid (20:4n-6)	
Appearance	Free flowing oil	
Colour	Yellow	
Odour	Characteristic	
ARA (%)	min. 38	max. 44
Hexadecanoic acid 16:0 (%)	min. 3	max. 15
Octadecanoic acid 18:0 (%)	min. 5	max. 20
Octadecenoic acid 18:1 (%)	min. 5	max. 38
Octadecadienoic acid 18:2 (%)	min. 4	max. 15
Peroxide value (meq/kg)	max. 5	
Moisture and volatiles (%)	max. 0.05	
Non-saponifiables (%)	max. 3.5	
Trans fatty acids (%)	max. 1.0	
Free fatty acid (%)	max. 0.4	
Lead (ppm)	max. 0.2	
Arsenic (ppm)	max. 0.5	
Copper (ppm)	max. 0.1	
Iron (ppm)	max. 0.5	
Mercury (ppm)	max. 0.2	
Hexane (ppm)	max. 0.3	

[20] *Standard 1.4.1 is varied by –*

[20.1] *omitting from Clause 4 the definitions for food and natural toxicant from the addition of a flavouring substance, substituting –*

(1) In this clause –

**food** means the food or class of foods listed in unbolded type in column 1 of the Table to this clause.

**natural toxicant from the addition of a flavouring substance** means a substance listed in bold type in column 1 of the Table to this clause.

[20.2] *omitting from Column 1 in the Table to clause 3 wherever occurring –*

mollusks

*substituting*

molluscs

[20.3] *omitting in Column 1 in the Table to clause 3 wherever occurring –*

mollusc

*substituting*

molluscs

[21] *Standard 1.4.2* is varied by -

[21.1] *omitting the Schedules heading and Schedules listed in the Table of Provisions, substituting –*

Schedule 1	Maximum residue limits
Schedule 2	Extraneous residue limits
Schedule 3	Chemical groups
Schedule 4	Foods and classes of food

[21.2] *omitting the editorial note immediately following subclause 2(2), substituting-*

**Editorial note:**

The limits for pesticides in drinking water are listed under ‘Pesticides’ in Chapter 3 of the *Australian Drinking Water Guidelines* (1996) NHMRC - ARMCANZ (National Health and Medical Research Council - Agriculture and Resource Management Council of Australia and New Zealand). The guidelines are available on the Internet at [www.nhmrc.gov.au/advice/publications](http://www.nhmrc.gov.au/advice/publications).

[21.3] *omitting from Schedule 1 the entry for Butroxydim after the entry for Ethoprophos and inserting after the entry for Bupirimate –*

<b>BUTROXYDIM</b>

EDIBLE OFFAL (MAMMALIAN)	E0.02

[21.13] *omitting from Schedule 4, the heading Molluscs, substituting -*

Molluscs - and other marine invertebrates.

[22] *Standard 1.5.1 is varied by -*

[22.1] *inserting in the Table to clause 2, into Column 1 and Column 2 respectively -*

Docosahexaenoic acid (DHA) – rich dried marine micro-algae ( <i>Schizochytrium</i> sp.)	May only be added to food according to Standard 1.3.4.
Docosahexaenoic acid (DHA) – rich oil derived from marine micro-algae ( <i>Schizochytrium</i> sp.)	May only be added to food according to Standard 1.3.4.
Tall oil phytosterols	<p>The requirements in clause 2 of Standard 1.2.3.</p> <p>The name ‘tall oil phytosterols’ or ‘plant sterols’ must be used when declaring the ingredient in the ingredient list, as prescribed in Standard 1.2.4.</p> <p>May only be added to food -</p> <p>(1) according to Standards 1.3.4 and 2.4.2; and</p> <p>(2) where the total saturated and trans fatty acids present in the food is no more than 28 % of the total fatty acid content of the food.</p>

[22.2] *inserting immediately after the Table to clause 2 -*

**Editorial note:**

The Table to clause 2 contains conditions relating to novel foods. Nothing contained in this Code permits the mixing of phytosterol esters and tall oil phytosterols.

[23] *Standard 1.5.2 is varied by inserting into Column 1 of the Table to clause 2, immediately after the last occurring entry -*

Food derived from glyphosate-tolerant corn line NK603
---

[24] *Standard 1.6.2 is varied by –*

[24.1] *omitting in Schedule Methods of Analysis where first mentioned –*

fermenting comminuted meat

*substituting*

fermented comminuted meat

[24.2] *omitting subclause 7(4), substituting –*

(3) Game meat offal, except for bone or cartilage attached to game meat flesh, must not be sold as or used in the preparation of food.

[25] *Standard 2.4.2 is varied by omitting paragraph 2(1)(f) and 2(1)(g), substituting -*

- (f) milk products; and
- (g) no more than 137 g/kg of phytosterol esters; or
- (h) no more than 80 g/kg of tall oil phytosterols.

[26] *Standard 2.5.4 is varied by omitting paragraph 2(d), substituting -*

- (d) gelatine; and

[27] *Standard 2.6.2 is varied by inserting in subclause 5(2) after electrolyte where first mentioned -*

drink

[28] *Standard 2.9.1 is varied by -*

[28.1] *omitting Standard 2.9.1, substituting -*

### **STANDARD 2.9.1**

## **INFANT FORMULA PRODUCTS**

---

### **Purpose**

This Standard provides for the compositional, and labelling requirements for foods intended or represented for use as a substitute for breast milk, herein referred to as ‘infant formula products’. This Standard applies to all infant formula products whether in powder, liquid concentrate or ‘ready to drink’ forms.

This Standard also provides for infant formula products intended for infants with special nutritional requirements.

Additionally, recommended guidelines regarding vitamins and minerals are contained at the end of this Standard. Standard 1.3.1 contains provisions relating to the food additives permitted in infant formula products. Standard 1.6.1 contains the microbiological limits in relation to infant formula products. Standard 1.3.4 contains specifications for permitted nucleotides and added nutrients. Standard 1.1.1 defines nutritive substances for the purposes of this Code.

### **Table of Provisions**

#### **Division 1 – General Provisions**

##### **Subdivision 1 - Interpretation**

- 1 Definitions
- 2 Interpretation

##### **Subdivision 2 - Calculations**

- 3 Calculation of energy

- 4 Calculation of protein
- 5 Calculation of potential renal solute load

Subdivision 3 - General compositional requirements

- 6 Restrictions and prohibitions
- 7 Permitted nutritive substances
- 8 Limit on nucleotide 5'-monophosphates
- 9 Lactic acid cultures
- 10 Limit on aluminium

Subdivision 4 - General labelling and packaging requirements

- 11 Representations of food as infant formula product
- 12 Prescribed names
- 13 Requirement for a measuring scoop
- 14 Required warnings, directions and statements
- 15 Print and package size
- 16 Declaration of nutrition information
- 17 Date marking and storage instructions
- 18 Statement of protein source
- 19 Statement on dental fluorosis
- 20 Prohibited representations

Division 2 – Infant Formula and Follow-on Formula

- 21 Composition
- 22 Protein
- 23 Fat
- 24 Vitamins and minerals

Division 3 – Infant Formula Products for Special Dietary Use

Subdivision 1 – Infant formula products formulated for premature or low birthweight infants

- 25 Composition and labelling
- 26 Additional labelling

Subdivision 2 – Infant formula products for metabolic, immunological, renal, hepatic and malabsorptive conditions

- 27 Composition
- 28 Claims
- 29 Composition of lactose free and low lactose formulas
- 30 Claims relating to lactose free and low lactose formulas

Subdivision 3 - Infant formula products for specific dietary use based upon protein substitutes

- 31 Composition
- 32 Protein
- 33 Vitamins and minerals
- 34 Additional permitted triglycerides

Schedule 1 Permitted forms of vitamins and minerals in infant formula products

Guidelines for infant formula products

**Clauses****Division 1****Subdivision 1 – Interpretation****1 Definitions**

(1) The definitions in clauses 1 and 2 of Standard 1.2.8 apply to this Standard.

(2) In this Code –

**follow-on formula** means an infant formula product represented as either a breast-milk substitute or replacement for infant formula and which constitutes the principal liquid source of nourishment in a progressively diversified diet for infants aged from six months.

**infant** means a person under the age of 12 months.

**infant formula** means an infant formula product represented as a breast milk substitute for infants and which satisfies the nutritional requirements of infants aged up to four to six months.

**Editorial note:**

A reference to infant formula product may include a reference to infant formula but the converse does not apply.

**infant formula product** means a product based on milk or other edible food constituents of animal or plant origin which is nutritionally adequate to serve as the principal liquid source of nourishment for infants.

**Editorial note:**

The intent of this definition is to limit the addition of ingredients to infant formula product to ingredients that would be considered to be foods. The addition of an ingredient that is not considered to be a food is prohibited unless specifically permitted elsewhere in this Standard.

Standard 1.5.1 contains prohibitions and restrictions relating to novel foods and novel food ingredients. Nothing contained in this Standard permits infant formula products to contain novel foods or novel food ingredients that are not permitted in Standard 1.5.1.

**lactose free formula** and **low lactose formula** means infant formula products which satisfy the needs of lactose intolerant infants.

**medium chain triglycerides** means triacylglycerols which contain predominantly the saturated fatty acids designated by 8:0 and 10:0.

**pre-term formula** means an infant formula product specifically formulated to satisfy particular needs of infants born prematurely or of low birthweight.

**protein substitute** means L-amino acids and/or the hydrolysate of one or more of the proteins on which infant formula product is normally based.

**soy-based formula** means an infant formula product in which soy protein isolate is the sole source of protein.

## 2 Interpretation

A reference to any infant formula product in the compositional provisions of this Standard is a reference to –

- (a) a powdered or concentrated form of infant formula product which has been reconstituted with water according to directions; or
- (b) an infant formula product in ‘ready to drink’ form.

## Subdivision 2 – Calculations

### 3 Calculation of energy

The energy content of infant formula product, expressed in kilojoules (kJ), must be calculated using –

- (a) only the energy value contributions of the fat, protein and carbohydrate ingredients of the infant formula product; and
- (b) the relevant energy factors set out in Standard 1.2.8.

### 4 Calculation of protein

The prescribed formula for the calculation of the protein content of infant formula product for the purposes of this Standard is -

Formula

For milk proteins and their partial protein hydrolysates -

Protein content = nitrogen content x 6.38; or

In any other case -

Protein content = nitrogen content x 6.25.

### 5 Calculation of potential renal solute load

The prescribed formula for the calculation of the potential renal solute load for the purposes of this Standard is -

**Formula**

Potential renal solute load in mOsm/100 kJ = [Na (mg/100 kJ) /23] + [Cl (mg/100 kJ) /35] + [K (mg/100 kJ) /39] + [P<sub>avail</sub> (mg/100 kJ)/ 31] + [N (mg/100 kJ) /28].

In this formula

P<sub>avail</sub> = P of milk-based formula + 2/3 of P of soy-based formulas.

### **Subdivision 3 - General compositional requirements**

#### **6 Restrictions and prohibitions**

(1) A vitamin, mineral, food additive or nutritive substance must not be added to infant formula product unless -

- (a) expressly permitted by this Code; or
- (b) it is naturally present in an ingredient of the infant formula product.

(2) Infant formula product must contain no detectable gluten.

#### **7 Permitted nutritive substances**

(1) Any nutritive substance listed in column 1 of the Table to this clause may be added to infant formula product provided that -

- (a) the nutritive substance is in one or more of the forms specified in column 2 of the Table in relation to that substance; and
- (b) the total amount of the nutritive substance in the infant formula product is no more than the amount specified in column 4 of the Table.

(2) The label on a package of infant formula product must not include any words indicating, or any other indication, that the product contains a nutritive substance specified in column 1 or in column 2 of the Table to this clause unless the total amount of the nutritive substance in the food is no less than the amount specified in column 3 of the Table.

#### **Editorial note:**

The intent of subclause 7(1) is that the maximum permitted amounts only apply when the substance is added, and in that case, it then applies to the sum of the naturally occurring and added nutritive substances.

This Standard contains guidelines on the use and format of nutrient information tables.

**Table to clause 7**

Column 1	Column 2	Column 3	Column 4
Nutritive substance	Permitted for ms	Minimum amount for claim per 100 kJ	Maximum amount per 100 kJ
Choline	Choline chloride Choline bitartrate	1.7 mg	7.1 mg
Inositol	Inositol	1.0 mg	9.5 mg
Taurine	Taurine	0.8 mg	3 mg
L-carnitine	L-carnitine	0.21 mg	0.8 mg
Cytidine 5'-monophosphate	Cytidine 5'-monophosphate Cytidine 5'-monophosphate sodium salt	0.22 mg	0.6 mg
Uridine 5'-monophosphate	Uridine 5'-monophosphate Uridine 5'-monophosphate sodium salt	0.13 mg	0.42 mg
Adenosine 5'-monophosphate	Adenosine 5'-monophosphate Adenosine 5'-monophosphate sodium salt	0.14 mg	0.38 mg
Guanosine 5'-monophosphate	Guanosine 5'-monophosphate Guanosine 5'-monophosphate sodium salt	0.04 mg	0.12 mg
Inosine 5'-monophosphate	Inosine 5'-monophosphate Inosine 5'-monophosphate sodium salt	0.08 mg	0.24 mg

## 8 Limit on nucleotide 5'-monophosphates

Infant formula product must contain no more than 3.8 mg/100 kJ of nucleotide 5'-monophosphates.

### Editorial note:

Standard 1.3.4 contains specifications for nucleotides.

## 9 Lactic acid cultures

L(+) producing lactic acid cultures may be added to infant formula product.

## 10 Limit on aluminium

- (1) Infant formula product, other than a pre-term formula or soy-based formula product, must contain no more than 0.05 mg of aluminium per 100 mL.
- (2) Pre-term formula must contain no more than 0.02 mg of aluminium per 100 mL.
- (3) Soy-based formula must contain no more than 0.1 mg of aluminium per 100 mL.

**Editorial note:**

Standard 1.4.1 contains the maximum level (ML) of lead contaminant in infant formula products.

**Subdivision 4 - General labelling and packaging requirements****11 Representations of food as infant formula product**

A food must not be represented as an infant formula product unless it complies with this Standard.

**12 Prescribed names**

‘Infant Formula’ and ‘Follow-on Formula’ are prescribed names.

**13 Requirement for a measuring scoop**

(1) A package of infant formula product in a powdered form must contain a scoop to enable the use of the infant formula product in accordance with the directions contained in the label on the package.

(2) Subclause (1) does not apply to single serve sachets, or packages containing single serve sachets of an infant formula product in a powdered form.

**14 Required warnings, directions and statements**

(1) The label on a package of infant formula product must include the following warning statement -

(a) in the case of infant formula product in powdered form -

‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not change proportions of powder except on medical advice. Incorrect preparation can make your baby very ill’; and

(b) in the case of concentrated infant formula product -

‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not change proportions of concentrate except on medical advice. Incorrect preparation can make your baby very ill’; and

(c) in the case of ‘ready to drink’ infant formula product -

‘Warning – follow instructions exactly. Prepare bottles and teats as directed. Do not dilute or add anything to this ‘ready to drink’ formula except on medical advice. Incorrect preparation can make your baby very ill’.

(2) The label on a package of infant formula product must include directions for the preparation and use of the infant formula product which include words and pictures instructing -

- (a) that each bottle should be prepared individually; and
- (b) that if a bottle of made up formula is to be stored prior to use, it must be refrigerated and used within 24 hours; and
- (c) that potable, previously boiled water should be used; and
- (d) where a package contains a measuring scoop, that only the enclosed scoop should be used; and
- (e) that formula left in the bottle after a feed must be discarded.

(3) Subject to subclause (4), the label on a package of infant formula product must contain the following warning statement -

‘Breast milk is best for babies. Before you decide to use this product, consult your doctor or health worker for advice.’;

under a heading that states –

‘Important Notice’ or any word or words having the same or similar effect.

(4) Subclause (3) does not apply to infant formula products for metabolic, immunological, renal, hepatic or malabsorptive conditions.

(5) The label on a package of an infant formula product must contain statements indicating that -

- (a) the infant formula product may be used from birth, in the case of infant formula; and
- (b) the infant formula product should not be used for infants aged under 6 months in the case of follow-on formula; and
- (c) except in the case of packages of pre-term formula, it is recommended that infants over the age of 6 months should be offered foods in addition to the infant formula product.

## **15 Print and package size**

(1) Where an infant formula product is in a package having a net weight of more than 500g, the statements required by subclauses 14(1), (3) and 26(1) must be in size of type of no less than 3 mm.

(2) Where an infant formula product is in a package having a net weight of 500 g or less the statements required by subclauses 14(1), (3) and 26(1) must be in size of type of no less than 1.5 mm.

## **16 Declaration of nutrition information**

(1) The label on a ‘ready to drink’ infant formula product must include a statement, which may be in the form of a table, that contains the following information –

- (a) the average energy content expressed in kJ per 100 mL; and
- (b) the average amount of protein, fat and carbohydrate expressed in g per 100 mL; and
- (c) the average amount of each vitamin, mineral and any other nutritive substance permitted by this Standard expressed in weight per 100 mL.

(2) The label on a powdered or concentrated form of infant formula product must include a statement, which may be in the form of a table that contains the following information -

- (a) the average energy content expressed in kJ per 100 mL of infant formula product that has been reconstituted according to directions; and
- (b) the average amount of protein, fat and carbohydrate expressed in g per 100 mL of infant formula product that has been reconstituted according to directions; and
- (c) the average amount of each vitamin, mineral and any other nutritive substance permitted by this Standard expressed in weight per 100 mL of infant formula product that has been reconstituted according to directions; and
- (d) a declaration –
  - (i) of the weight of one scoop in the case of powdered infant formula; and
  - (ii) of the proportion of powder or concentrate required to reconstitute the formula according to directions.

## **17 Date marking and storage instructions**

(1) Paragraphs 2(1)(c) and (d) of Standard 1.2.5 do not apply to this Standard.

(2) A label on a package of infant formula product must contain storage instructions covering the period after it is opened.

### **Editorial note:**

The appropriate storage instructions should be valid for the full range of climatic conditions that exist in Australia and New Zealand.

## **18 Statement of protein source**

The label on a package of infant formula product must contain a statement of the specific source, or sources, of protein in the infant formula product immediately adjacent to the name of the infant formula product.

### **Editorial note:**

Standard 1.2.2 requires that all food be labelled with its name. The requirement in clause 18 of this Standard applies only to the name on the label on the product in accordance with the requirement in Standard 1.2.2.

**19 Statement on dental fluorosis**

- (1) An infant formula product must comply with subclause (2) where it contains -
- (a) more than 17 µg of fluoride per 100 kJ prior to reconstitution, in the case of powdered or concentrated infant formula product; or
  - (b) more than 0.15 mg of fluoride per 100 mL, in the case of 'ready to drink' formula.
- (2) The label on a package of infant formula product referred to in subclause (1) must contain statements -
- (a) indicating that consumption of the formula has the potential to cause dental fluorosis; and
  - (b) recommending that the risk of dental fluorosis should be discussed with a medical practitioner or other health professional.

**20 Prohibited representations**

The label on a package of infant formula product must not contain -

- (a) a picture of an infant; or
- (b) a picture that idealises the use of infant formula product; or
- (c) the word 'humanised' or 'maternalised' or any word or words having the same or similar effect; or
- (d) words claiming that the formula is suitable for all infants; or
- (e) information relating to the nutritional content of human milk; or
- (f) subject to clause 28, a reference to the presence of any nutrient or nutritive substance, except for a reference to a nutrient or nutritive substance in -
  - (i) the name of a lactose free formula or a low lactose formula; or
  - (ii) a statement of ingredients; or
  - (iii) a nutrition information statement; or
- (g) subject to Division 3, a representation that the food is suitable for a particular condition, disease or disorder.

**Editorial Note:**

Division 3 relates to Infant Formula Products for Special Dietary Use. Clause 28 permits labelling which varies from this clause.

**Division 2 – Infant Formula and Follow-on Formula****21 Composition**

- (1) Infant formula and follow-on formula must -

- (a) have an energy content of no less than 2500 kJ/L and no more than 3150 kJ/L in the case of infant formula, and no less than 2500 kJ/L and no more than 3550 kJ/L in the case of follow-on formula; and
- (b) contain an amount of each nutrient specified in column 1 of the Table to this clause which is no less than the amount specified in column 2 of the Table and no more than the amount specified in column 3 of the Table.

**Table to clause 21**

Column 1	Column 2	Column 3
Nutrient	Minimum amount per 100 kJ	Maximum amount per 100 kJ
Protein	0.45 g	0.7 g for infant formula 1.3 g for follow-on formula
Fat	1.05 g	1.5 g

- (2) Follow-on formula must have a potential renal solute load value of no more than 8 mOsm/100 kJ.

## **22 Protein**

- (1) The L-amino acids listed in column 1 of the Table to this clause must be present in infant formula and follow-on formula at the minimum level specified in column 2 of the Table, subject to subclause 2 and 3.

**Table to clause 22**

Column 1	Column 2
L-Amino Acid	Minimum amount per 100 kJ
Histidine	12 mg
Isoleucine	21 mg
Leucine	42 mg
Lysine	30 mg
Cysteine & Methionine	19 mg
Phenylalanine & Tyrosine	32 mg
Threonine	19 mg
Tryptophan	7 mg
Valine	25 mg

- (2) Infant formula or follow-on formula must provide no less than -

- (a) 6 mg cysteine per 100 kJ; and
- (b) 17 mg phenylalanine per 100 kJ.

- (3) L-amino acids listed in the Table to this clause must be added to infant formula or follow-on formula only in an amount necessary to improve protein quality.

## **23 Fat**

The fats in infant formula and follow-on formula must -

- (a) not contain medium chain triglycerides except where a medium chain triglyceride is present in a particular infant formula or follow-on formula as the result of being a natural constituent of a milk-based ingredient of that particular infant formula or follow-on formula; and
- (b) have a ratio of linoleic acid to  $\alpha$ -linolenic acid of no less than 5 to 1 and no more than 15 to 1; and
- (c) if specified in column 1 of the Table to this clause, comply with the limits, if any, specified in columns 2 and 3 of the Table; and
- (d) have a ratio of total long chain omega 6 series fatty acids ( $C \geq 20$ ) to total long chain omega 3 series fatty acids ( $C \geq 20$ ) of approximately 2 in an infant formula or follow-on formula which contains those fatty acids; and
- (e) where long chain polyunsaturated fatty acids are present in an infant formula or follow-on formula, an eicosapentaenoic acid (20:5 n-3) content of no more than the docosahexaenoic acid (22:6 n-3) content.

**Table to clause 23**

Column 1	Column 2	Column 3
Fatty acids	Minimum % total fatty acids	Maximum % total fatty acids
<b>Essential fatty acids</b>		
Linoleic acid (18:2)	9	26
$\alpha$ -Linolenic acid (18:3)	1.1	4
<b>Long chain polyunsaturated fatty acids</b>		
Long chain omega 6 series fatty acids ( $C \geq 20$ )		2
Arachidonic acid (20:4)		1
Long chain omega 3 series fatty acids ( $C \geq 20$ )		1
<b>Total trans fatty acids</b>		4
<b>Erucic acid (22:1)</b>		1

**Editorial note:**

Standard 1.3.4 contains specifications for Docosahexaenoic acid (DHA) rich oil derived from the algae *Cryptocodinium cohnii* and Arachidonic acid (ARA) rich oil derived from the fungus *Mortierella alpina*.

**24 Vitamins and minerals**

- (1) Infant formula and follow-on formula must contain the vitamins and minerals specified in column 1 of the Table to this subclause provided that, in relation to each vitamin or mineral -
- (a) the added vitamin or mineral is in a permitted form as listed in Schedule 1; and
  - (b) the infant formula or follow-on formula contains no less than the amount specified in column 2 of the Table; and
  - (c) the infant formula or follow-on formula contains no more than the amount specified in column 3 of the Table, if any.

**Table to clause 24(1)**

Column 1	Column 2	Column 3
Nutrient	Minimum amount per 100 kJ	Maximum amount per 100 kJ
<b>Vitamins</b>		
Vitamin A	14 µg	43 µg
Vitamin D	0.25 µg	0.63 µg
Vitamin C	1.7 mg	
Thiamin	10 µg	
Riboflavin	14 µg	
Preformed Niacin	130 µg	
Vitamin B <sub>6</sub>	9 µg	36 µg
Folate	2.0 µg	
Pantothenic acid	70 µg	
Vitamin B <sub>12</sub>	0.025 µg	
Biotin	0.36 µg	
Vitamin E	0.11 mg	1.1 mg
Vitamin K	1.0 µg	
<b>Minerals</b>		
Sodium	5 mg	15 mg
Potassium	20 mg	50 mg
Chloride	12 mg	35 mg
Calcium	12 mg	
Phosphorus	6 mg	25 mg
Magnesium	1.2 mg	4.0 mg
Iron	0.2 mg	0.5 mg
Iodine	1.2 µg	10 µg
Copper	14 µg	43 µg
Zinc	0.12 mg	0.43 mg
Manganese	0.24 µg	24.0 µg
Selenium	0.25 µg	1.19 µg

(2) Infant formula and follow-on formula must contain no less than 0.5 mg of Vitamin E per g of polyunsaturated fatty acids.

(3) The ratio of calcium to phosphorus in infant formula and follow-on formula must be no less than 1.2 to 1 and no more than 2 to 1.

(4) The ratio of zinc to copper -

- (a) in infant formula must be no more than 15 to 1; and
- (b) in follow-on formula must be no more than 20 to 1.

**Editorial note:**

This Standard contains guidelines setting out the recommended levels of vitamins and minerals that as a matter of good practice should not be exceeded.

### **Division 3 - Infant Formula Products for Special Dietary Use**

#### **Subdivision 1 – Infant formula products formulated for premature or low birthweight infants**

##### **25 Composition and labelling**

Infant formula products may be specifically formulated for premature or low birthweight infants provided that in all other respects they comply with this Standard.

##### **26 Additional labelling**

- (1) The label on a package of pre-term formula must include the warning statement -  
‘Suitable only for pre-term infants under specialist medical supervision’.
- (2) The words ‘pre-term’ must appear as part of the name of a food standardised in this subdivision.

#### **Subdivision 2 - Infant formula products for metabolic, immunological, renal, hepatic and malabsorptive conditions**

##### **27 Composition**

- (1) Subject to subclause (2), infant formula products may be specifically formulated to satisfy particular metabolic, immunological, renal, hepatic or malabsorptive conditions.
- (2) The permission in subclause (1) only applies where the infant formula products comply with –
  - (a) this Division; and
  - (b) all the other requirements of this Standard that are not inconsistent with this Division.
- (3) Other than for the operation of clause 28, subclause (2) takes effect 5 years after the commencement of this Standard.

##### **28 Claims**

Where a label contains a claim that the infant formula product is suitable for infants with metabolic, immunological, renal, hepatic or malabsorptive conditions, then the label on the package of infant formula product must include a statement indicating -

- (a) that the product is not suitable for general use and should be used under medical supervision; and
- (b) the condition, disease or disorder for which the food has been specially formulated; and
- (c) the nutritional modifications, if any, which have been made to the infant formula product.

**29 Composition of lactose free and low lactose formulas**

- (1) A lactose free formula or low lactose formula must, except for the lactose content, comply with the compositional and labelling requirements which apply to the infant formula product of which they are a variety.
- (2) Lactose free formula must contain no detectable lactose.
- (3) Low lactose formula must contain no more than 0.3 g lactose per 100 mL of infant formula product.

**30 Claims relating to lactose free and low lactose formulas**

Where a label contains a claim that the infant formula product is lactose free, low lactose or words of similar import, the label on a package of lactose free or a low lactose formula product must include -

- (a) the words 'lactose free' as part of the name of lactose free formula; and
- (b) the words 'low lactose' as part of the name of low lactose formula; and
- (c) the following statements -
  - (i) the amount of lactose expressed in g per 100 mL; and
  - (ii) the amount of galactose expressed in g per 100 mL.

**Subdivision 3 - Infant formula products for specific dietary use based upon protein substitutes****31 Composition**

An infant formula product for specific dietary use based upon protein substitutes must -

- (a) have an energy content of no less than 2500 kJ/L and no more than 3150 kJ/L in the case of infant formula, and no less than 2500 kJ/L and no more than 3550 kJ/L in the case of follow-on formula; and
- (b) have a potential renal solute load of no more than 8 mOsm per 100 kJ; and
- (c) contain an amount of each nutrient specified in column 1 of the Table to this clause which is no less than the amount specified in column 2 of the Table and no more than the amount specified in column 3 of the Table.

**Table to clause 31**

Column 1	Column 2	Column 3
Nutrient	Minimum amount per 100 kJ	Maximum amount per 100 kJ
Protein	0.45 g	1.4 g
Fat	0.93 g	1.5 g

### 32 Protein

- (1) The protein content of an infant formula product for specific dietary use based upon protein substitutes may be in the form of protein substitute.
- (2) The L-amino acids listed in column 1 of the Table to this clause must be present in infant formula product for special dietary use at the minimum level specified in column 2 of the Table, subject to subclause 3 and 4.

**Table to clause 32**

Column 1	Column 2
L-Amino Acid	Min amount per 100 kJ
Histidine	12 mg
Isoleucine	21 mg
Leucine	42 mg
Lysine	30 mg
Cysteine & Methionine	19 mg
Phenylalanine & Tyrosine	32 mg
Threonine	19 mg
Tryptophan	7 mg
Valine	25 mg

- (3) Infant formula product for specific dietary use based upon protein substitutes must provide no less than -
- (a) 6 mg cysteine per 100 kJ; and
  - (b) 17 mg phenylalanine per 100 kJ.
- (4) L-amino acids listed in the Table to this clause must be added to infant formula product for specific dietary use based upon protein substitutes only in an amount necessary to improve protein quality.

### 33 Vitamins and minerals

An infant formula product for specific dietary use based upon protein substitutes must contain -

- (a) chromium in an amount of no less than 0.35 µg per 100 kJ and no more than 2.0 µg per 100 kJ; and
- (b) molybdenum in an amount of no less than 0.36 µg per 100 kJ and no more than 3.0 µg per 100 kJ.

#### **Editorial note:**

The provisions of clause 24 of this Standard also apply in respect of the vitamins and minerals permitted in an infant formula product for specific dietary use based upon protein substitutes.

### 34 Additional permitted triglycerides

An infant formula product for specific dietary use based upon protein substitutes may contain added medium chain triglycerides.

#### SCHEDULE 1

#### PERMITTED FORMS OF VITAMINS AND MINERALS IN INFANT FORMULA PRODUCTS

Column 1 Vitamins or minerals	Column 2 Permitted Forms
Vitamin A	Retinol Forms vitamin A (retinol) vitamin A acetate (retinyl acetate) vitamin A palmitate (retinyl palmitate) retinyl propionate Carotenoid Forms beta-carotene
Vitamin C	L-ascorbic acid L-ascorbyl palmitate calcium ascorbate potassium ascorbate sodium ascorbate
Vitamin D	vitamin D <sub>2</sub> (ergocalciferol) vitamin D <sub>3</sub> (cholecalciferol) vitamin D (cholecalciferol-cholesterol)
Thiamin	thiamin hydrochloride thiamin mononitrate
Riboflavin	riboflavin riboflavin-5'-phosphate, sodium
Niacin	niacinamide (nicotinamide)
Vitamin B <sub>6</sub>	pyridoxine hydrochloride pyridoxine-5'-phosphate
Folate	folic acid
Pantothenic acid	calcium pantothenate Dexpanthenol
Vitamin B <sub>12</sub>	Cyanocobalamin Hydroxocobalamin
Biotin	d-Biotin
Vitamin E	dl- $\alpha$ -tocopherol d- $\alpha$ -tocopherol concentrate tocopherols concentrate, mixed d- $\alpha$ -tocopheryl acetate dl- $\alpha$ -tocopheryl acetate d- $\alpha$ -tocopheryl acid succinate dl- $\alpha$ -tocopheryl succinate
Vitamin K	vitamin K <sub>1</sub> , as phylloquinone (phytonadione) phytylmenquinone
Calcium	calcium carbonate calcium chloride calcium citrate

	calcium gluconate calcium glycerophosphate calcium hydroxide calcium lactate calcium oxide calcium phosphate, dibasic calcium phosphate, monobasic calcium phosphate, tribasic calcium sulphate
Chloride	calcium chloride magnesium chloride potassium chloride sodium chloride
Chromium	chromium sulphate
Copper	copper gluconate cupric sulphate cupric citrate
Iodine	potassium iodate potassium iodide sodium iodide
Iron	ferric ammonium citrate ferric pyrophosphate ferrous citrate ferrous fumarate ferrous gluconate ferrous lactate ferrous succinate ferrous sulphate
Magnesium	magnesium carbonate magnesium chloride magnesium gluconate magnesium oxide magnesium phosphate, dibasic magnesium phosphate, tribasic magnesium sulphate
Manganese	manganese chloride manganese gluconate manganese sulphate manganese carbonate manganese citrate
Molybdenum	sodium molybdate VI dehydrate
Phosphorus	calcium glycerophosphate calcium phosphate, dibasic calcium phosphate, monobasic calcium phosphate, tribasic magnesium phosphate, dibasic potassium phosphate, dibasic potassium phosphate, monobasic potassium phosphate, tribasic sodium phosphate, dibasic sodium phosphate, monobasic sodium phosphate, tribasic
Potassium	potassium bicarbonate potassium carbonate potassium chloride potassium citrate potassium glycerophosphate potassium gluconate

	potassium hydroxide potassium phosphate, dibasic potassium phosphate, monobasic potassium phosphate, tribasic
Selenium	sodium selenite seleno methionine
Sodium	sodium bicarbonate sodium carbonate sodium chloride sodium chloride iodised sodium citrate sodium gluconate sodium hydroxide sodium iodide sodium lactate sodium phosphate, dibasic sodium phosphate, monobasic sodium phosphate, tribasic sodium sulphate sodium tartrate
Zinc	zinc acetate zinc chloride zinc gluconate zinc oxide zinc sulphate

## GUIDELINES FOR INFANT FORMULA PRODUCTS

(These guidelines are not part of the legally binding Standard)

### Guideline for maximum amount of vitamins and minerals in infant formula products

It is recommended that the quantities specified in the table below be observed as the maximum levels of vitamins and minerals in infant formula product.

Nutrient	Recommended maximum amount per 100 kJ
<b>Vitamins</b>	
Vitamin C	5.4 mg
Thiamin	48 µg
Riboflavin	86 µg
Preformed Niacin	480 µg
Folate	8.0 µg
Pantothenic acid	360 µg
Vitamin B <sub>12</sub>	0.17 µg
Vitamin K	5.0 µg
Biotin	2.7 µg
<b>Minerals</b>	
Calcium	33 mg
Phosphorus	22 mg
Manganese	7.2 µg for infant formula products regulated by Division 3, Subdivision 2 only
Chromium	2.0 µg
Molybdenum	3 µg

## Guideline on advice regarding additional vitamin and mineral supplementation

Manufacturers are recommended to provide an advice in the label on a package of infant formula product to the effect that consumption of vitamin or mineral preparations are not necessary.

### Nutrition information table

The nutrition information contained in the label on a package of infant formula product is recommended in the following format -

#### NUTRITION INFORMATION

	Average amount per 100 mL made up formula * 1	Average amount per 100 g of powder (or per 100 mL for liquid concentrate) *2
Energy	kJ	kJ
Protein	g	g
Fat	g	g
Carbohydrate	g	g
Vitamin A	µg	µg
Vitamin B <sub>6</sub>	µg	µg
Vitamin B <sub>12</sub>	µg	µg
Vitamin C	mg	mg
Vitamin D	µg	µg
Vitamin E	µg	µg
Vitamin K	µg	µg
Biotin	µg	µg
Niacin	mg	mg
Folate	µg	µg
Pantothenic acid	µg	µg
Riboflavin	µg	µg
Thiamin	µg	µg
Calcium	mg	mg
Copper	µg	µg
Iodine	µg	µg
Iron	mg	mg
Magnesium	mg	mg
Manganese	µg	µg
Phosphorus	mg	mg
Selenium	µg	µg
Zinc	mg	mg
Chloride	mg	mg
Potassium	mg	mg
Sodium	mg	mg
(insert any other nutritive substance to be declared)	g, mg, µg	g, mg, µg

\*1 – Delete the words ‘made up formula’ in the case of formulas sold in ‘ready to drink’ form.

\*2 – Delete this column in the case of formulas sold in ‘ready to drink’ form.

Note: The information in column 2 is not mandatory.

[29] *Standard 3.1.1* is varied by –

[29.1] *omitting from* Clause 1 *definition of* primary food production –

However, primary food production does not include:

- (a) any process involving the substantial transformation of food (for example, manufacturing or canning), regardless of whether the process is carried out on the premises in which the food was grown, cultivated, picked, harvested, collected or caught; or
- (b) the sale or service of food directly to the public; or
- (c) any other food production activity prescribed by the regulations under the Act for the purposes of this definition.

*substituting*

However, primary food production does not include:

- (d) any process involving the substantial transformation of food (for example, manufacturing or canning), regardless of whether the process is carried out on the premises in which the food was grown, cultivated, picked, harvested, collected or caught; or
- (e) the sale or service of food directly to the public; or
- (f) any other food production activity prescribed by the regulations under the Act for the purposes of this definition.

[30] *Standard 3.2.3* is varied by *omitting* Clause 1 *definitions for* adequate supply of water *and* potable water, *substituting* –

**adequate supply of water** means potable water that is available at a volume, pressure and temperature that is adequate for the purposes for which the water is used.

**potable water** means water that is acceptable for human consumption.
