2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS

For the 12 months ended 31 December 2001

1 Statement of accounting policies

Special purpose financial statements

These financial statements are made pursuant to UnitedNetworks' obligations under the Gas (Information Disclosure) Regulations 1997. They are in addition to the company's financial statements published pursuant to the company's obligations under the Companies Act 1993 and the Financial Reporting Act 1993.

In these statements UnitedNetworks has adopted the avoidable cost allocation methodology stipulated in the Electricity Information Disclosure Handbook issued on 30th June 2000. The Electricity Lines business is treated as the core business activity and other activities are accounted for through the Gas Lines and Other business unit financial statements.

General accounting policies

The general accounting principles as recommended by the Institute of Chartered Accountants of New Zealand for the measurement and reporting of operating surplus on a historical cost basis have been followed by the company.

Particular accounting policies

The following particular accounting policies which materially affect the measurement of the financial performance and position have been applied:

Income tax

These financial statements adopt the liability method of accounting whereby the income tax expense shown in the statement of financial performance is the estimated total liability relating to the income for the period. Deferred taxation is accounted for in respect of items relating to the statement of financial performance, following the liability method, on the comprehensive basis.

Fixed assets

All fixed assets are recorded at cost or the most recent valuation. The gas reticulation assets are currently carried at cost.

Financial instruments

The company has financial instruments with off-balance sheet risk for the primary purpose of reducing its exposure to fluctuations in interest rates and foreign exchange rates.

Financial instruments entered into as hedges of an underlying exposure are accounted for on the same basis as the underlying exposure. Accordingly hedge gains and losses are included in the Statement of Financial Performance when the gains or losses arising on the related physical exposures are recognised in the Statement of Financial Performance.

2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS (con't)

Depreciation

Depreciation of fixed assets, other than freehold land, has been charged at rates calculated to allocate on a straight-line basis either the assets' cost, or the valuation, less estimated residual value, over their estimated useful lives as follows:

- | | | |
|-------|-------------------------------|---------------|
| (i) | Freehold Buildings | 50– 100 years |
| (ii) | Reticulation System | 15 – 70 years |
| (iii) | Plant, Vehicles and Equipment | 3 - 10 years |

Goodwill

Goodwill on acquisition of businesses is amortised on a straight-line basis over the period of expected benefit or 20 years, whichever is the lesser.

Identifiable intangibles

Identifiable intangibles arising from acquisition of reticulation assets are amortised on a straight-line basis over the period of expected benefit, which has been assessed as 40 years.

Accounts receivable

Accounts Receivable are stated at their estimated net realisable value.

Revenue recognition

Income from gas lines charges includes an estimated amount for accrued sales for charges not billed at balance date.

Reclassification of prior year balances

Certain prior year balances have been reclassified to conform with changes in presentation.

Comparative information

On 1 April 2000, UnitedNetworks purchased the gas lines from Orion New Zealand Limited. This disclosure covers the 12 months to 31 December 2001 with comparative information covering the 9 months to 31 December 2000. Refer to Orion New Zealand Limited's previous disclosures for past data.

2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS (con't)

	2001 (\$000)	2000 (\$000)
12 Borrowings		
The company had borrowings which support the requirements of the group and are not specific to a business line. The following profile is indicative of borrowings applicable to the gas lines.		
Borrowings are made up as follows:		
Bank loans	68,373	458,965
Commercial paper	143,155	78,455
Medium term notes – fixed rate NZ\$	84,840	-
Medium term notes – floating rate A\$	243,158	-
	539,526	537,420
The borrowing repayment terms are:		
Payable within 1 year	8,547	77,220
Payable between 1 and 2 years	202,981	-
Payable between 2 and 3 years	-	460,200
Payable between 3 and 5 years	-	-
Payable after 5 years	327,998	-
	539,526	537,420

All borrowings are unsecured with all bank loans being subject to negative pledge arrangements. Commercial paper is supported by a 2 year standby facility made available by a syndicate of banks and is issued for various terms up to 90 days.

Interest rates for all bank loans are floating based on the bank bill rate plus a margin. Medium term notes – fixed rate NZ\$ mature April 2007 and are shown at the value of proceeds received after deducting the discount on issue and adjusted for the amount amortised.

Medium term notes – fixed rate A\$ mature April 2008 and April 2011.

The weighted average interest rate is 5.3%.

2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS (con't)

14 Financial instruments

The company has a comprehensive treasury policy to manage the risks of financial instruments which is approved by the board of directors.

Interest rate risk

The company has long term borrowings, which are used to fund ongoing activities. The company actively manages interest rate exposures in accordance with treasury policy. In this respect, at least 60% of all term debt must be at fixed interest rates or effectively fixed using interest rate swaps, forward rate agreements, options and similar derivative instruments.

Indicative weighted average rates of borrowings are as follows:

	2001		2000	
	Weighted ave interest rate	Face value (\$000)	Weighted ave interest rate	Face value (\$000)
Bank loans	5.68%	68,373	7.19%	458,965
Commercial paper	5.10%	143,155	6.73%	78,455
Medium term notes – fixed rate NZ\$	6.50%	85,466	-	-
Medium term notes – floating rate A\$	4.88%	243,158	-	-
	5.30%	540,152	7.12%	537,420

Indicative weighted average rates of interest rate swaps are as follows:

	2001		2000	
	Weighted ave interest rate	Face value (\$000)	Weighted ave interest rate	Face value (\$000)
Interest rate swaps				
Maturing in less than 1 year	5.91%	79,056	6.20%	48,750
Maturing between 1 and 2 years	6.20%	47,006	6.05%	44,850
Maturing between 2 and 5 years	7.11%	190,161	6.81%	167,700
Maturing after 5 years	7.01%	106,832	7.13%	142,350
	6.76%	423,055	6.76%	403,650

Foreign exchange risk

The company has, in this reporting period, conducted transactions in foreign currencies for the purposes of protecting the NZ \$ value of capital expenditure and for the issuance of A\$ bonds which have been hedged with cross currency swaps. Of the interest rate swaps, \$243,158,000 relates to cross currency swaps.

At balance date the group has no significant exposure to foreign currency risk.

2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS (con't)

14 Financial instruments (con't)

Credit risk

In the normal course of its business, the company incurs credit risk from energy retailers, financial institutions and trade debtors. The company has a credit policy, which is used to manage this exposure to credit risk.

As part of this policy, the company can only have exposures to financial institutions having at least a credit rating of A- long term and A- short term from Standard & Poors (or equivalent rating). In addition, limits on exposures to financial institutions have been set by the board of directors and are monitored on a regular basis. In this respect, the company minimises their credit risk by spreading such exposures across a range of institutions. The company does not anticipate non-performance by any of these financial institutions.

The company has some concentration of credit exposures to a few large energy retailers. To minimise this risk, the company performs credit evaluations on all energy retailers and other electricity customers and requires a bond or other form of security where deemed necessary.

The maximum exposure to credit risk is represented by the carrying value of each financial asset in the statement of financial position.

Fair values

The estimated fair value of financial instruments as applicable to the gas lines at 31 December is:

	2001		2000	
	Carrying Amount (\$000)	Fair Value (\$000)	Carrying Amount (\$000)	Fair Value (\$000)
Cash and bank	1,158	1,158	612	612
Bank loans	68,373	68,373	458,965	458,965
Commercial paper	143,155	143,155	78,455	78,455
Medium term notes - fixed rate NZ\$	84,840	83,381	-	-
Medium term notes - floating rate A\$	243,158	243,128	-	-
Interest rate swaps	-	(6,464)	-	(5,332)
Cross currency swaps	-	345	-	-

The following methods and assumptions were used to estimate the fair value of each class of financial instrument where it is practical to estimate that value:

Cash and short-term deposits, short term loans

The carrying amount of these items is equivalent to the fair value. Bank overdrafts are set off against cash balances pursuant to right of set off.

Commercial paper

The carrying amount of these items is equivalent to their fair value

Medium term notes

The fair value of NZ\$ notes is based on quoted market prices.

The fair value of A\$ notes is based on the face value converted at the exchange rate prevailing at year end.

2.3 NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS (con't)

14 Financial instruments (con't)

Derivative instruments

The fair value of interest rate swaps, forward rate agreements, interest rate options and other derivative instruments is estimated based on the quoted market prices for these instruments.

15 Segmental reporting

The predominant activity of UnitedNetworks is the ownership and operation of distribution networks. All operations are conducted in New Zealand.

16 Capital commitments

At balance date, estimated capital expenditure contracted for but not provided for was \$1.69 million (2000: zero).

17 Contingent liabilities

The company has no contingent liabilities at balance date.

18 Transactions with related parties

Deutsche Bank AG is a shareholder in the parent company of UtiliCorp NZ Limited and details of transactions apportioned to the Gas Lines have been disclosed as if Deutsche Bank AG were a related party.

	2001	2000
	(\$000)	(\$000)
Success fees paid to Deutsche Bank Limited	338	5,000
Interest payments to Deutsche Bank AG	8,242	2,021
Borrowings owing to Deutsche Bank AG	9,572	251,706
Interest and other balances due to Deutsche Bank AG	56	1,807

The company is a subsidiary of UtiliCorp NZ Limited. The ultimate holding company is Aquila. Inc (previously UtiliCorp United Inc.), which is incorporated in the United States of America.

A New Zealand subsidiary of Deutsche Bank AG purchased a shareholding in a parent company of UtiliCorp NZ Limited on 30 June 2000. Deutsche Bank provides advisory and financing services to UnitedNetworks Limited. All transactions between UnitedNetworks Limited and Deutsche Bank are conducted on an arms length basis under normal market conditions.

19 Events occurring after balance date

The Directors are not aware of any significant event occurring subsequent to balance date which, if known at balance date, would have resulted in a different assessment of the amount attributable to an item in the financial statements.

3.3 RELIABILITY PERFORMANCE MEASURES

For the 12 months ended 31 December 2001

Schedule 1 – PART 4

Unplanned Interruptions in Distribution Systems

a) The measure of unplanned interruptions (other than those directly resulting from unplanned interruptions of a transmission system) calculated by the formula a/b where:

a = the sum obtained by adding together the number of customer-hours lost during each interruption; and

b = the total number of customers being supplied by means of the system.

System	Unplanned interruption measure (within distribution system)

On systems where the number of customers affected has been recorded, the duration of each interruption is not recorded and the local engineer has estimated the average length of the interruptions.
Data indicated by # has been amalgamated into the Wellington system.

3.3 RELIABILITY PERFORMANCE MEASURES (con't)

b) The measure of unplanned interruptions directly resulting from unplanned interruptions of a transmission system calculated by the formula **a/b** where:

a = the sum obtained by adding together the number of customer-hours lost during each interruption; and

b = the total number of customers being supplied by means of the system.
