Science & Innovation

Research, Science, and Technology Act 2010

Criteria for Proposals for Partnerships Funding

1. Notice to the Science Board

Pursuant to section 8(1) of the Research, Science, and Technology Act 2010, I set the criteria specified in this notice for the assessment by the Science Board of proposals for partnerships funding.

2. Interpretation

In this notice:

research organisation means an organisation whose primary business function and activity is the provision of science and technology services and expertise, and may be a Crown Research Institute, a Tertiary Education Institute, or an independent research organisation.

research user means an entity that uses research and determines the outcomes that will result from research.

3. Policy objective

3.1 The policy objective of the partnerships funding tool is to invest in research, science, or technology, or related activities that increase competitiveness in New Zealand industries through the establishment of partnerships between research organisations and research users.

3.2 It is intended that partnerships will:

- (a) Provide for early and ongoing user engagement in research, science, or technology, or related activities, so as to increase the likelihood that the partnership will achieve successful application of the research; and
- (b) develop user capability by engaging productively with researchers, so as to encourage an increase in the level of private investment in New Zealand-based research, science, or technology, or related activities.

4. Eligibility criteria

Proposals for partnerships funding must be assessed against the following eligibility criteria:

4.1 Partnership members

The partnership:

- (a) must include at least two research users or at least one industry representative body; and
- (b) must include at least one research organisation, which may be either a partner in the partnership, or an organisation contracted by the research users to undertake the research, science, or technology, or related activities of the partnership; and
- (c) may include non-New Zealand partners, provided that the proposal meets the benefits to New Zealand criteria set out in clause 5 of this notice.

4.2 Funding

Co-funding is intended to leverage the government's investment in the partnership. The partnership members must invest cash co-funding in the partnership that represents at least 50% of the total cost of the research, science, or technology, or related activities carried out by the partnership during the term of the relevant contract.

Additional criteria relating to co-funding are set out in clause 6.4.

4.3 Partnership viability

Each organisation in the partnership must:

- (a) be financially stable;
- (b) have a good trading history; and
- (c) demonstrate that it can provide the co-funding required by clause 4.2.

4.4 Partnership governance

The partnership must have appropriate governance arrangements in place that reflect best practice.

4.5 Intellectual property (IP) agreements

The partnership must:

- (a) have an IP agreement signed by all parties to the partnership that is fair, commercially sensible, covers all key issues, and reflects shared risks proportional to shared benefits; and

- (b) have an IP policy that reflects the need to capture the maximum benefit for New Zealand from the Ministry's investment.

4.6 Partnership research, science and technology and related activities

The partnership may carry out research, science, or technology, or related activities that use international research capability and infrastructure facilities if the partnership can demonstrate that this is necessary to achieve the objectives of the partnership. However, a significant proportion of the research should be undertaken in New Zealand.

5. Assessment criteria

Proposals for partnerships funding that meet the eligibility criteria must be assessed against the following assessment criteria:

 - the assessment and allocation must take into account the research outcomes outlined in the relevant Sector Investment Plan ("Plan") (if any), including the investment strategy for each output expense.

- Biological Industries Research.
 - High Value Manufacturing and Services Research.
