**Environment****Resource Management Act 1991****National Policy Statement for Renewable Electricity Generation 2011**

SIR ANAND SATYANAND, Governor-General

ORDER IN COUNCIL

At Wellington this 11th day of April 2011

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL  
PRESIDING IN COUNCIL

Pursuant to section 52(2) of the Resource Management Act 1991, His Excellency the Governor-General, acting on the advice and with the consent of the Executive Council and on the recommendation of the Minister for the Environment (having satisfied the requirements of that Act), approves the following national policy statement.

**PREAMBLE**

This national policy statement sets out an objective and policies to enable the sustainable management of renewable electricity generation under the Resource Management Act 1991 ("the Act").

New Zealand's energy demand has been growing steadily and is forecast to continue to grow. New Zealand must confront two major energy challenges as it meets growing energy demand. The first is to respond to the risks of climate change by reducing greenhouse gas emissions caused by the production and use of energy. The second is to deliver clean, secure, affordable energy while treating the environment responsibly.

The contribution of renewable electricity generation, regardless of scale, towards addressing the effects of climate change plays a vital role in the wellbeing of New Zealand, its people and the environment. In considering the risks and opportunities associated with various electricity futures, central government has reaffirmed the strategic target that 90 per cent of electricity generated in New Zealand should be derived from renewable energy sources by 2025 (based on delivered electricity in an average hydrological year) providing this does not affect security of supply.

Development that increases renewable electricity generation capacity can have environmental effects that span local, regional and national scales, often with adverse effects manifesting locally and positive effects manifesting nationally.

This national policy statement does not apply to the allocation and prioritisation of freshwater as these are matters for regional councils to address in a catchment or regional context and may be subject to the development of national guidance in the future.

In some instances the benefits of renewable electricity generation can compete with matters of national importance as set out in section 6 of the Act, and with matters to which decision-makers are required to have particular regard under section 7 of the Act. In particular, the natural resources from which electricity is generated can coincide with areas of significant natural character, significant amenity values, historic heritage, outstanding natural features and landscapes, significant indigenous vegetation and significant habitats of indigenous fauna. There can also be potential conflicts with the relationship of Maori with their taonga and the role of kaitiaki. The New Zealand Coastal Policy Statement 2010 also addresses these issues in the coastal environment. Increased national consistency in addressing the competing values associated with the development of New Zealand's renewable energy resources will provide greater certainty to decision-makers, applicants, and the wider community.

#### **TITLE**

This national policy statement is the National Policy Statement for Renewable Electricity Generation 2011.

#### **COMMENCEMENT**

This national policy statement will take effect 28 days after the date of its issue by notice in the *New Zealand Gazette*.

#### **INTERPRETATION**

In this national policy statement, unless the context otherwise requires:

**Act** means the Resource Management Act 1991.

**Decision-makers** means all persons exercising functions and powers under the Act.

**Distribution network** means a distributor's lines and associated equipment used for the conveyance of electricity on lines other than lines that are part of the national grid.

**Distributor** means a business engaged in distribution of electricity.

#### **MATTER OF NATIONAL SIGNIFICANCE**

The matters of national significance to which this national policy statement applies are:

- (a) the need to develop, operate, maintain and upgrade renewable electricity generation activities throughout New Zealand; and
- (b) the benefits of renewable electricity generation.

#### **OBJECTIVE**

To recognise the national significance of renewable electricity generation activities by providing for the development, operation, maintenance and upgrading of new and existing renewable electricity generation activities, such that the proportion of New Zealand's electricity generated from renewable energy sources increases to a level that meets or exceeds the New Zealand Government's national target for renewable electricity generation.

#### **A RECOGNISING THE BENEFITS OF RENEWABLE ELECTRICITY GENERATION ACTIVITIES**

##### **POLICY A**

Decision-makers shall recognise and provide for the national significance of renewable electricity generation activities, including the national, regional and local benefits relevant to renewable electricity generation activities. These benefits include, but are not limited to:

- (a) maintaining or increasing electricity generation capacity while avoiding, reducing or displacing greenhouse gas emissions;
- (b) maintaining or increasing security of electricity supply at local, regional and national levels by diversifying the type and/or location of electricity generation;
- (c) using renewable natural resources rather than finite resources;
- (d) the reversibility of the adverse effects on the environment of some renewable electricity generation technologies;
- (e) avoiding reliance on imported fuels for the purposes of generating electricity.

**B ACKNOWLEDGING THE PRACTICAL IMPLICATIONS OF ACHIEVING NEW ZEALAND'S TARGET FOR ELECTRICITY GENERATION FROM RENEWABLE RESOURCES****POLICY B**

Decision-makers shall have particular regard to the following matters:

- (a) Maintenance of the generation output of existing renewable electricity generation activities can require protection of the assets, operational capacity and continued availability of the renewable energy resource; and
- (b) even minor reductions in the generation output of existing renewable electricity generation activities can cumulatively have significant adverse effects on national, regional and local renewable electricity generation output; and
- (c) meeting or exceeding the New Zealand Government's national target for the generation of electricity from renewable resources will require the significant development of renewable electricity generation activities.

**C ACKNOWLEDGING THE PRACTICAL CONSTRAINTS ASSOCIATED WITH THE DEVELOPMENT, OPERATION, MAINTENANCE AND UPGRADING OF NEW AND EXISTING RENEWABLE ELECTRICITY GENERATION ACTIVITIES****POLICY C1**

Decision-makers shall have particular regard to the following matters:

- (a) The need to locate the renewable electricity generation activity where the renewable energy resource is available;
- (b) logistical or technical practicalities associated with developing, upgrading, operating or maintaining the renewable electricity generation activity;
- (c) the location of existing structures and infrastructure including, but not limited to, roads, navigation and telecommunication structures and facilities, the distribution network and the national grid in relation to the renewable electricity generation activity, and the need to connect renewable electricity generation activity to the national grid;
- (d) designing measures which allow operational requirements to complement and provide for mitigation opportunities; and
- (e) adaptive management measures.

**POLICY C2**

When considering any residual environmental effects of renewable electricity generation activities that cannot be avoided, remedied or mitigated, decision-makers shall have regard to offsetting measures or environmental compensation including measures or compensation which benefit the local environment and community affected.

**D MANAGING REVERSE SENSITIVITY EFFECTS ON RENEWABLE ELECTRICITY GENERATION ACTIVITIES****POLICY D**

Decision-makers shall, to the extent reasonably possible, manage activities to avoid reverse sensitivity effects on consented and on existing renewable electricity generation activities.

**E INCORPORATING PROVISIONS FOR RENEWABLE ELECTRICITY GENERATION ACTIVITIES INTO REGIONAL POLICY STATEMENTS AND REGIONAL AND DISTRICT PLANS****E1 SOLAR, BIOMASS, TIDAL, WAVE AND OCEAN CURRENT RESOURCES****POLICY E1**

Regional policy statements and regional and district plans shall include objectives, policies and methods (including rules within plans) to provide for the development, operation, maintenance, and upgrading of new and existing renewable electricity generation activities using solar, biomass, tidal, wave and ocean current energy resources to the extent applicable to the region or district.

**E2 HYDRO-ELECTRICITY RESOURCES****POLICY E2**

Regional policy statements and regional and district plans shall include objectives, policies, and methods (including rules within plans) to provide for the development, operation, maintenance, and upgrading of new and existing hydro-electricity generation activities to the extent applicable to the region or district.

**E3 WIND RESOURCES****POLICY E3**

Regional policy statements and regional and district plans shall include objectives, policies, and methods (including rules within plans) to provide for the development, operation, maintenance and upgrading of new and existing wind energy generation activities to the extent applicable to the region or district.

**E4 GEOTHERMAL RESOURCES****POLICY E4**

Regional policy statements and regional and district plans shall include objectives, policies, and methods (including rules within plans) to provide for the development, operation, maintenance, and upgrading of new and existing electricity generation activities using geothermal resources to the extent applicable to the region or district.

## **F INCORPORATING PROVISIONS FOR SMALL AND COMMUNITY-SCALE RENEWABLE ELECTRICITY GENERATION ACTIVITIES INTO REGIONAL POLICY STATEMENTS AND REGIONAL AND DISTRICT PLANS**

### **POLICY F**

As part of giving effect to Policies E1 to E4, regional policy statements and regional and district plans shall include objectives, policies, and methods (including rules within plans) to provide for the development, operation, maintenance and upgrading of small and community-scale distributed renewable electricity generation from any renewable energy source to the extent applicable to the region or district.

## **G ENABLING IDENTIFICATION OF RENEWABLE ELECTRICITY GENERATION POSSIBILITIES**

### **POLICY G**

Regional policy statements and regional and district plans shall include objectives, policies, and methods (including rules within plans) to provide for activities associated with the investigation, identification and assessment of potential sites and energy sources for renewable electricity generation by existing and prospective generators.

## **H TIME WITHIN WHICH IMPLEMENTATION IS REQUIRED**

### **POLICY H1**

Unless already provided for within the relevant regional policy statement or proposed regional policy statement, regional councils shall give effect to Policies A, B, C, D, E, F and G by notifying using Schedule 1 of the Act, a change or variation (whichever applies) within 24 months of the date on which this national policy statement takes effect.

### **POLICY H2**

Unless already provided for within the relevant regional or district plans or proposed plans, plan changes or variations, local authorities shall give effect to Policies A, B, C, D, E, F and G by notifying using Schedule 1 of the Act, a change or variation (whichever applies) within the following timeframes:

### Commissions of Inquiry Act 1908

#### Royal Commission of Inquiry into Building Failure caused by Canterbury Earthquakes

Elizabeth the Second, by the Grace of God Queen of New Zealand and her Other Realms and Territories, Head of the Commonwealth, Defender of the Faith:

To The Honourable MARK LESLIE SMITH COOPER, of Auckland, Judge of the High Court of New Zealand; Sir RONALD POWELL CARTER, KNZM, of Auckland, Engineer and Strategic Adviser; and RICHARD COLLINGWOOD FENWICK, of Christchurch, Associate Professor of Civil Engineering:

GREETING:

*Recitals*

WHEREAS the Canterbury region, including Christchurch City, suffered an earthquake on 4 September 2010 and numerous aftershocks, for example—

- (a) the 26 December 2010 (or Boxing Day) aftershock; and
- (b) the 22 February 2011 aftershock:

WHEREAS approximately 180 people died of injuries suffered in the 22 February 2011 aftershock, with most of those deaths caused by injuries suffered wholly or partly because of the failure of certain buildings in the Christchurch City central business district (CBD), namely the following 2 buildings:

- (a) the Canterbury Television (or CTV) Building; and
- (b) the Pyne Gould Corporation (or PGC) Building:

WHEREAS other buildings in the Christchurch City CBD, or in suburban commercial or residential areas in the Canterbury region, failed in the Canterbury earthquakes, causing injury and death:

WHEREAS a number of buildings in the Christchurch City CBD have been identified as unsafe to enter following the 22 February 2011 aftershock, and accordingly have been identified with a red card to prevent persons from entering them:

WHEREAS the Department of Building and Housing has begun to investigate the causes of the failure of 4 buildings in the Christchurch City CBD (the **4 specified buildings**), namely the 2 buildings specified above, and the following 2 other buildings:

- (a) the Forsyth Barr Building; and
- (b) the Hotel Grand Chancellor Building;

WHEREAS it is desirable to inquire into the building failures in the Christchurch City CBD, to establish—

- (a) why the 4 specified buildings failed severely; and
- (b) why the failure of those buildings caused such extensive injury and death; and
- (c) why certain buildings failed severely while others failed less severely or there was no readily perceptible failure:

WHEREAS the results of the inquiry should be available to inform decision-making on rebuilding and repair work in the Christchurch City CBD and other areas of the Canterbury region:

*Appointment and order of reference*

KNOW YE that We, reposing trust and confidence in your integrity, knowledge, and ability, do, by this Our Commission, nominate, constitute, and appoint you, The Honourable MARK LESLIE SMITH COOPER, Sir RONALD POWELL CARTER, and RICHARD COLLINGWOOD FENWICK, to be a Commission to inquire into and report (making any interim or final recommendations that you think fit) upon (having regard, in the case of paragraphs (a) to (c), to the nature and severity of the Canterbury earthquakes)—

*Inquiry into sample of buildings and 4 specified buildings*

- (a) in relation to a reasonably representative sample of buildings in the Christchurch City CBD, including the 4 specified buildings as well as buildings that did not fail or did not fail severely in the Canterbury earthquakes—
  - (i) why some buildings failed severely; and
  - (ii) why the failure of some buildings caused extensive injury and death; and
  - (iii) why buildings differed in the extent to which—
    - (A) they failed as a result of the Canterbury earthquakes; and
    - (B) their failure caused injury and death; and
  - (iv) the nature of the land associated with the buildings inquired into under this paragraph and how it was affected by the Canterbury earthquakes; and
  - (v) whether there were particular features of a building (or a pattern of features) that contributed to whether a building failed, including (but not limited to) factors such as—
    - (A) the age of the building; and
    - (B) the location of the building; and
    - (C) the design, construction, and maintenance of the building; and
    - (D) the design and availability of safety features such as escape routes; and
- (b) in relation to all of the buildings inquired into under paragraph (a), or a selection of them that you consider appropriate but including the 4 specified buildings,—
  - (i) whether those buildings (as originally designed and constructed and, if applicable, as altered and maintained) complied with earthquake-risk and other legal and best-practice requirements (if any) that were current—
    - (A) when those buildings were designed and constructed; and
    - (B) on or before 4 September 2010; and
  - (ii) whether, on or before 4 September 2010, those buildings had been identified as “earthquake-prone” or were the subject of required or voluntary measures (for example, alterations or strengthening) to make the buildings less susceptible to earthquake risk, and the compliance or standards they had achieved; and
- (c) in relation to the buildings inquired into under paragraph (b), the nature and effectiveness of any assessment of them, and of any remedial work carried out on them, after the 4 September 2010 earthquake, or after the 26 December 2010 (or Boxing Day) aftershock, but before the 22 February 2011 aftershock; and

*Inquiry into legal and best-practice requirements*

- (d) the adequacy of the current legal and best-practice requirements for the design, construction, and maintenance of buildings in central business districts in New Zealand to address the known risk of earthquakes and, in particular—
  - (i) the extent to which the knowledge and measurement of seismic events have been used in setting legal and best-practice requirements for earthquake-risk management in respect of building design, construction, and maintenance; and
  - (ii) the legal requirements for buildings that are “earthquake-prone” under section 122 of the Building Act 2004 and associated regulations, including—
    - (A) the buildings that are, and those that should be, treated by the law as “earthquake-prone”; and
    - (B) the extent to which existing buildings are, and should be, required by law to meet requirements for the design, construction, and maintenance of new buildings; and
    - (C) the enforcement of legal requirements; and
  - (iii) the requirements for existing buildings that are not, as a matter of law, “earthquake-prone”, and do not meet current legal and best-practice requirements for the design, construction, and maintenance of new buildings, including whether, to what extent, and over what period they should be required to meet those requirements; and
  - (iv) the roles of central government, local government, the building and construction industry, and other elements of the private sector in developing and enforcing legal and best-practice requirements; and
  - (v) the legal and best-practice requirements for the assessment of, and for remedial work carried out on, buildings after any earthquake, having regard to lessons from the Canterbury earthquakes; and

- (vi) how the matters specified in subparagraphs (i) to (v) compare with any similar matters in other countries; and

*Other incidental matters arising*

- (e) any other matters arising out of, or relating to, the foregoing that come to the Commission's notice in the course of its inquiries and that it considers it should investigate:

*Matters upon or for which recommendations required*

And, without limiting the order of reference set out above, We declare and direct that this Our Commission also requires you to make both interim and final recommendations upon or for—

- (a) any measures necessary or desirable to prevent or minimise the failure of buildings in New Zealand due to earthquakes likely to occur during the lifetime of those buildings; and
- (b) the cost of those measures; and
