**CERTIFICATION OF FINANCIAL STATEMENTS, PERFORMANCE MEASURES,  
AND STATISTICS DISCLOSED BY PIPELINE OWNERS OTHER THAN THE  
CORPORATION**

We, JAMES MILLER and ANTHONY JOHN CARTER,  
directors of Vector Limited, certify that, having made all reasonable enquiry, to  
the best of our knowledge, –

- (a) the attached audited financial statements of the consolidated Vector Limited's and NGC Holdings Limited's gas distribution lines businesses, prepared for the purposes of regulation 6 of the Gas (Information Disclosure) Regulations 1997, comply with the requirements of that regulation; and
- (b) the attached information, being the financial performance measures, efficiency performance measures, energy delivery performance measures and statistics, and reliability performance measures in relation to the consolidated Vector Limited's and NGC Holdings Limited's gas distribution lines businesses, and having been prepared for the purposes of regulations 15 to 19 of the Gas (Information Disclosure) Regulations 1997, complies with the requirements of those regulations.

## **VECTOR LIMITED & SUBSIDIARIES GAS DISTRIBUTION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2009**

#### **ENTITIES REPORTING**

These consolidated financial information disclosure statements comprise the gas distribution activities of Vector Limited and its subsidiaries. The gas distribution activities involve the ownership and supply of pipeline function services for the distribution of gas.

Vector Limited is a company registered under the Companies Act 1993. Vector Limited is an issuer for the purpose of the Financial Reporting Act 1993 and its financial statements comply with that Act. Vector Limited has adopted New Zealand International Financial Reporting Standards, as such these consolidated financial information disclosure statements follow the same accounting policies as that of Vector Limited and comply with New Zealand equivalents to IFRS. The accounting policies as they relate to the gas distribution activities are detailed below.

These consolidated financial information disclosure statements for the gas distribution activities of the Vector group are special purpose financial reports.

In accordance with the Gas (Information Disclosure) Regulation 1997, these consolidated financial information disclosure statements have been prepared on the basis that the initial acquisition of 67.21% of NGC gas distribution business occurred at 1 July 2004 and the subsequent balance acquired of 32.79% occurred at the beginning of the financial year 1 July 2005. The actual dates of initial and subsequent acquisition were 14 December 2004 and 10 August 2005 respectively.

#### **STATUTORY BASE**

The consolidated financial information disclosure statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

#### **MEASUREMENT BASE**

The consolidated financial information disclosure statements are prepared on the basis of historical cost and should be read in conjunction with the accounting policies in the Vector Limited's annual report for the year ended 30 June 2009.

The avoidable cost allocation methodology (ACAM) as described in the Electricity Information Disclosure Handbook 31 March 2004 has been adopted, for the allocation of revenues, costs, assets and liabilities between the regulated activities and other activities of the company. Under the Gas (Information Disclosure) Regulation 1997, there is no mandated allocation methodology, thus ACAM as prescribed in the Electricity Information Disclosure Handbook has been applied.

The NGC gas distribution activities and the Vector gas distribution activities are treated as separate regulated standalone businesses and then consolidated for presentation in these information disclosure statements. This approach has been adopted as the Vector Auckland Gas Distribution business was subject to a provisional price control authorisation issued by the Commerce Commission (Commerce Act (Natural Gas Services) Provisional Authorisation 2005), at balance date.

The allocations have been carried out on the following basis:

- Direct allocation of all components of financial statement items which are directly attributable to the activity.
- For any components of financial statement items that are not directly attributable to an activity:
  - By assessing the proportions of those components which are avoidable and non-avoidable; and
  - Allocating those components amongst the activities on the basis of those proportions using an appropriate cost allocator.

The two main allocators used are the number of employees and the book value of property, plant and equipment. Some costs like IT costs and non-system asset depreciation are separately analysed and are allocated using allocators specific to those costs.

All financial statement items not allocated to the standalone gas distribution activities, are allocated to other activities within the Vector group. Other activities are not disclosed within these consolidated financial information disclosure statements.

#### **GOING CONCERN**

The financial statements have been prepared on a going concern basis.

## **VECTOR LIMITED & SUBSIDIARIES GAS DISTRIBUTION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES (CONTINUED) FOR THE YEAR ENDED 30 JUNE 2009**

#### **SIGNIFICANT ACCOUNTING POLICIES**

The following specific accounting policies that materially affect the measurement of operating surplus and balance sheet items have been applied consistently to all periods presented in the consolidated financial statements.

#### **A) BASIS OF CONSOLIDATION**

##### **Subsidiaries**

Subsidiaries are those entities controlled, directly or indirectly by Vector Limited. The financial statements of subsidiaries are included in the consolidated financial statements using the purchase method of consolidation.

##### **Goodwill arising on acquisition**

Goodwill arising on acquisition of a subsidiary or associate represents the excess of the purchase consideration over the fair value of the identifiable assets, liabilities and contingent liabilities acquired. Goodwill is measured at cost less accumulated impairment losses.

#### **B) REVENUE**

##### **Sale of services**

Sales of services are recognised at fair value of the consideration received or receivable as the services are delivered or to reflect the percentage completion of the related services where delivered over time.

#### **C) GOODS AND SERVICES TAX (GST)**

The income statement has been prepared so that all components are stated exclusive of GST. All items in the balance sheet are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

#### **D) RECEIVABLES**

Receivables are carried at estimated realisable value after providing against debts where collection is doubtful.

#### **E) INVENTORIES**

Inventories are measured at lower of cost and net realisable value. The cost of inventories is determined on a first-in-first-out or weighted average cost basis and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. Net realisable value is the estimated selling price less the estimated costs of completion and selling expenses.

#### **F) INCOME TAX**

Income tax expense comprises current and deferred tax.

Income tax assets and liabilities are the expected tax payable or receivable on the taxable income for the year, using tax rates enacted or substantively enacted at balance date, and any adjustment to tax payable or receivable in respect of previous years. During the financial period, the income tax liability or asset is estimated based on the forecast effective tax rate for that entire financial period.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Movements in deferred tax assets and liabilities are recognised within tax expense in the income statement unless the temporary difference initially arose in equity or the difference resulted from application of ACAM to balance sheet items in which case the movement is then recognised as an adjustment in equity and / or borrowings against the item to which the temporary difference relates.

## **VECTOR LIMITED & SUBSIDIARIES GAS DISTRIBUTION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES (CONTINUED) FOR THE YEAR ENDED 30 JUNE 2009**

#### **SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

##### **F) INCOME TAX (CONTINUED)**

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at balance date.

Deferred tax assets including unutilised tax losses are recognised to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilised. Deferred tax assets are reviewed at balance date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

##### **G) PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are tangible assets expected to be used during more than one financial period and include spares held for the servicing of other property, plant and equipment that is owned.

The initial cost of purchased property, plant and equipment is the value of the consideration given to acquire the property, plant and equipment and the value of other directly attributable costs, which have been incurred in bringing the property, plant and equipment to the location and condition necessary for the intended service.

The initial cost of self-constructed property, plant and equipment includes the cost of all materials used in construction, direct labour on the project, financing costs that are attributable to the project, costs of ultimately dismantling and removing the items and restoring the site on which they are located (where an obligation exists to do so) and an appropriate proportion of the other directly attributable overheads incurred in bringing the items to working condition for their intended use. Financing costs that would have been avoided if the expenditure on qualifying assets had not been made are capitalised while the construction activities are in progress. Costs cease to be capitalised as soon as the property, plant and equipment is ready for productive use and do not include any costs of abnormal waste.

Uninstalled property, plant and equipment are stated at the lower of cost and estimated recoverable amount. Estimated recoverable amount is the greater of the estimated amount from the future use of the property, plant and equipment and its ultimate disposal, and its fair value less costs to sell.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation and impairment losses.

Subsequent expenditure relating to an item of property, plant and equipment is added to its gross carrying amount when such expenditure can be measured reliably and either increases the future economic benefits beyond its existing service potential, or is necessarily incurred to enable future economic benefits to be obtained, and that expenditure would have been included in the initial cost of the item had the expenditure been incurred at that time. The costs of day-to-day servicing of property, plant and equipment are recognised in the income statement as incurred.

##### **H) IDENTIFIABLE INTANGIBLE ASSETS**

###### **Goodwill**

Goodwill is allocated to cash-generating units (CGUs) or groups of CGUs, being the lowest level at which the goodwill is monitored for internal management purposes. Goodwill is then tested annually for impairment against the recoverable amount of the CGUs or groups of CGUs to which goodwill has been allocated.

###### **Software**

Software that is not integral to the functionality of the related hardware is classified as an intangible asset. It is amortised on a straight line basis over its useful life, commencing on the date it is brought for use. Software assets which are integral to the operation of the related hardware are classified as computer equipment within property, plant and equipment. Software intangible assets have a useful life of between 2 and 10 years.

**VECTOR LIMITED & SUBSIDIARIES  
GAS DISTRIBUTION ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES (CONTINUED)  
FOR THE YEAR ENDED 30 JUNE 2009****SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****I) DEPRECIATION**

Depreciation of property, plant and equipment other than freehold land is calculated on a straight line basis so as to expense the cost of the property, plant and equipment, less any expected residual value, to the income statement over its useful economic life.

Depreciation commences when the item of property, plant and equipment is brought into productive use, or when such items become available for use.

**ESTIMATED  
USEFUL LIVES  
YEARS**

|                               |          |
|-------------------------------|----------|
| Distribution systems          | 15 – 100 |
| Plant, vehicles and equipment | 3 – 40   |

**J) LEASED ASSETS****Finance leases**

Property, plant and equipment under finance leases, where substantially all the risks and rewards of ownership are assumed by the gas distribution activities as lessee, are recognised as non-current assets in the balance sheet. Leased property, plant and equipment are recognised initially at the lower of the present value of the minimum lease payments or their fair value. A corresponding liability is established and each lease payment apportioned between the reduction of the outstanding liability and the finance expense. The finance expense is charged to the income statement in each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Leased property, plant and equipment are depreciated over the shorter of the lease term and the useful life of equivalent owned property, plant and equipment.

**Operating leases**

Payments made under operating leases, where the lessors effectively retain substantially all the risks and benefits of ownership of the leased property, plant and equipment are recognised in the income statement on a straight-line basis over the lease term. Lease incentives received are recognised as an integral part of the total lease expense over the term of the lease. Property, plant and equipment used under operating leases are not recognised in the balance sheet.

**Leasehold improvements**

The cost of improvements to leasehold property are capitalised and depreciated over the unexpired period of the lease or the estimated useful life of the improvements, whichever is the shorter.

**K) PROVISIONS****Employee entitlements**

Employee entitlements to salaries and wages, annual leave, long-term leave and other benefits are recognised when they accrue to employees.

**Other provisions**

Provisions are estimated by discounting the expected future cash flows at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where a provision is currently expected to be utilised within one year, or where the future actions of a third party could cause the liability to be settled within one year, the provision is not discounted.

The amortisation or unwinding of any discount applied in establishing the net present value of provisions is charged to finance costs in the income statement as the period of discounting diminishes.

## **VECTOR LIMITED & SUBSIDIARIES GAS DISTRIBUTION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES (CONTINUED) FOR THE YEAR ENDED 30 JUNE 2009**

#### **SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

##### **K) PROVISIONS (CONTINUED)**

Provisions are liabilities which arise where it is considered, as a result of a past event, that a constructive or legal obligation exists to settle items in the foreseeable future. A provision is recognised where the likelihood of a resultant liability is considered more probable than not and the amount required to settle the liability can be reliably estimated. Where the likelihood of a resultant liability is more than remote but insufficient to warrant a provision, such events are disclosed as contingent liabilities.

##### **L) FINANCIAL INSTRUMENTS**

The allocation of debt and equity items is in accordance with the principles and rules of ACAM.

##### **M) FOREIGN CURRENCY TRANSLATION**

Transactions in foreign currencies are translated to the functional currency at exchange rates at the dates of the transactions unless transactions are hedged by foreign currency derivative instruments. Foreign currency differences arising on translation are recognised in the income statement. At balance date foreign monetary assets and liabilities are translated at the functional currency closing rate, and exchange variations arising from these translations are included in the income statement.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at historic cost are not retranslated at balance date.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined and are not retranslated at balance date.

##### **N) IMPAIRMENT**

The carrying amounts of the assets are reviewed at balance date to determine whether there is any evidence of impairment.

Where assets are deemed to be impaired, the impairment loss is the amount that the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

###### **Impairment of receivables**

The carrying amount of the receivables is compared to the recoverable amount which is amortised cost. Amortised cost is estimated as the present value of estimated future cash flows. Long term receivables are discounted to reflect the time value of money. An impairment loss is recognised if the carrying amount of a receivable or grouping of similar receivables exceeds its recoverable amount. Receivables with a short duration are not discounted.

For trade receivables which are not significant on an individual basis, collective impairment is assessed on a portfolio basis based on numbers of days overdue, and taking into account previous experience of doubtful or delayed collection of debts on portfolios with a similar amount of days overdue.

###### **Impairment of non-financial assets**

The carrying amounts of the non-financial assets, other than inventories and deferred tax assets, are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists then the asset's carrying amount is compared to its recoverable amount to determine the level of impairment if any. For goodwill, recoverable amount is determined at least annually and compared with the carrying value for impairment testing purposes.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the income statement.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

**VECTOR LIMITED & SUBSIDIARIES  
GAS DISTRIBUTION ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES (CONTINUED)  
FOR THE YEAR ENDED 30 JUNE 2009****SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****N) IMPAIRMENT (CONTINUED)****Impairment of non-financial assets (continued)**

Impairment losses recognised in prior periods are assessed at each balance date for any indications that the loss has decreased or no longer exists. An impairment loss may be reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed to the income statement only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, if no impairment loss had been recognised.

**NEW STANDARDS EARLY-ADOPTED**

Refer to the accounting policies within Vector Limited's annual report for the year ended 30 June 2009 for detailed information.

**APPROVAL OF FINANCIAL STATEMENTS**

The financial statements were approved by the board of directors on 23 November 2009.

## **NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)** **FOR THE YEAR ENDED 30 JUNE 2009**

### **6. NOTIONAL RESERVES**

|   | 2009<br>\$000  | 2008<br>\$000  |
|---|----------------|----------------|
| Balance at beginning of the period      | 116,090        | 111,238        |
| Operating surplus for the period        | 11,119         | 4,852          |
| Increase due to debt-equity ratio reset | 103,789        | -              |
| <b>Balance at end of the period</b>     | <b>230,998</b> | <b>116,090</b> |

Notional reserves is determined by adjusting debt and equity balances such that the debt to equity ratio is consistent with the Vector group. The debt and equity balances have been reset in 2009 to reflect the change in the Vector group's debt to equity ratio, which changed significantly during the year due to the sale of Wellington electricity network and the subsequent restructuring of various financing arrangements.

Interest and other internal costs are capitalised to property, plant and equipment while under construction. Interest is capitalised against property, plant and equipment largely at a capitalisation rate of 8% per annum. During the year \$0.5 million (30 June 2008: \$0.5 million) of interest and other costs were capitalised.

| Balance at beginning of the period  | 1,670        | 747          |
| Additions:                          |              |              |
| Provision for employee entitlements | 20           | 394          |
| Other                               | -            | 539          |
| Utilised                            | (665)        | (10)         |
| <b>Balance at end of the period</b> | <b>1,025</b> | <b>1,670</b> |

#### 11. BORROWINGS

Borrowings are a notional loan from Vector Limited.

The interest cost on the borrowings has been calculated using a weighted average interest rate of 7.72% (30 June 2008: 8.03%) applicable to the Vector group borrowings.

#### 12. COMMITMENTS

#### 13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

##### FOREIGN EXCHANGE RISK

Transactions are conducted in foreign currencies for the purpose of protecting the NZD value of capital expenditure. The outstanding forward exchange contracts are used to hedge forecasted foreign currency exposure arising out of the capital expenditure program. Hence at balance date no significant exposure to foreign currency risk exists.

##### CREDIT RISK

In the normal course of business, there is exposure to credit risks from energy retailers, and customers. Credit policies are in place, which are used to manage the exposure to credit risks.

There exists some concentration of credit exposures with a few large energy retailers and large energy customers. To minimise this risk, credit evaluations are performed on all energy retailers and large energy customers and requirement of a bond or other form of security where deemed necessary is made.

| c (i) Accounting rate of profit (excluding current borrowings from working capital) <sup>2</sup>        | 7.81%                        | 6.75%                        | 6.04%                        | <sup>3</sup> 10.64%         |
| c (ii) Accounting rate of profit (including current borrowings in working capital) <sup>2</sup>         | 8.97%                        | 8.22%                        | 6.69%                        | <sup>4</sup> 13.48%         |
| <b>2 Efficiency performance measures</b>  |                              |                              |                              |                             |
| a Direct line costs per kilometre   | \$701                        | \$707                        | \$755                        | \$846                       |
| b Indirect line costs per gas customer  | \$109                        | \$116                        | \$144                        | \$155                       |

<sup>1</sup> The financial performance ratios have been prepared under NZ IFRS for 2009, 2008 and 2007 years. The 2007 year are significantly different as compared to the previously disclosed 2007 ratios prepared under pre-IFRS NZ GAAP. Key reasons for the changes under the transition to NZ IFRS are:

- Goodwill is not amortised under NZ IFRS. This has resulted in an increase in earnings before interest and tax.
- Software assets classified as property, plant and equipment under pre-IFRS NZ GAAP are reclassified as intangible assets under NZ IFRS. This reduces fixed assets which therefore reduces average capital employed.
- On transition to NZ IFRS the Vector group reallocated goodwill to its cash generating units. This resulted in a reduction in the goodwill allocated to the gas distribution activities along with a corresponding reduction in equity.
- Deferred tax is calculated using the balance sheet approach under NZ IFRS. This resulted in a decrease in the deferred tax liability and a corresponding increase in equity.

<sup>2</sup> The regulations are silent on the treatment of amortisation. Earnings before interest and tax is calculated after amortisation. This treatment is consistent with NZ GAAP.

<sup>3</sup> Accounting rate of profit (including current borrowings in working capital) is 1.99% excluding revaluations.

<sup>4</sup> Accounting rate of profit (excluding current borrowings from working capital) is 1.59% excluding revaluations.

### GAS DISTRIBUTION ACTIVITIES

#### ENERGY DELIVERY EFFICIENCY PERFORMANCE MEASURES AND STATISTICS

FOR THE YEAR ENDED 30 JUNE 2009

|  | 2009              | 2008       | 2007       | 2006       |
|--|-------------------|------------|------------|------------|
| <b>3 Energy delivery efficiency performance measures</b>   |                   |            |            |            |
| Load factor <sup>5</sup>   | <b>78.41%</b>     | 80.59%     | 78.27%     | 79.01%     |
| Unaccounted for gas ratio <sup>5</sup>   | <b>1.64%</b>      | 1.40%      | 1.39%      | 1.34%      |
| <b>4 Statistics</b>  |                   |            |            |            |
| System length (km)   | <b>10,061</b>     | 9,911      | 9,756      | 9,358      |
| Maximum monthly amount of gas entering system (GJ) <sup>5</sup>  | <b>2,296,534</b>  | 2,287,144  | 2,406,065  | 2,458,233  |
| Total annual amount of gas conveyed through system (GJ) <sup>5</sup>   | <b>21,607,463</b> | 22,117,219 | 22,597,621 | 23,306,357 |
| Total annual amount of gas conveyed through system for persons not in a prescribed business relationship (GJ) <sup>5</sup> | <b>12,605,677</b> | 11,999,196 | 12,012,132 | 10,156,387 |
| Total number of customers  | <b>148,357</b>    | 145,122    | 140,872    | 136,769    |

<sup>5</sup> The methodology used to calculate the amount of gas (GJ) that was disclosed for 2006 and 2007 for Vector's non-controlled (NGC) distribution activities was amended in 2008 to provide a consistent methodology across Vector's total distribution activities. The previously disclosed figures have been adjusted to provide a consistent basis for comparison; this has necessitated minor adjustments being made to the corresponding values for load factor and unaccounted for gas ratio. The previously disclosed figures were as follows:

|   | 2007       | 2006       |
|---|------------|------------|
| Load factor   | 78.09%     | 79.10%     |
| Unaccounted for gas ratio   | 1.41%      | 1.36%      |
| Maximum monthly amount of gas entering system (GJ)  | 2,383,459  | 2,425,488  |
| Total annual amount of gas conveyed through system (GJ)   | 22,335,868 | 23,022,375 |
| Total annual amount of gas conveyed through system for persons not in a prescribed business relationship (GJ) | 10,507,493 | 9,983,381  |

**NGC HOLDINGS LIMITED  
GAS RETAILING ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES  
FOR THE YEAR ENDED 30 JUNE 2009****ENTITIES REPORTING**

These financial information disclosure statements comprise the gas retailing activities of NGC Holdings Limited and its subsidiaries. The gas retailing activities involve the supply of gas to consumers.

NGC Holdings Limited is a company registered under the Companies Act 1993. NGC Holdings Limited is a wholly owned subsidiary of Vector Limited. NGC Holdings Limited has adopted New Zealand International Financial Reporting Standards, as such these financial information disclosure statements follow the same accounting policies as that of Vector Limited and comply with New Zealand equivalents to IFRS. The accounting policies as they relate to the gas retailing activities are detailed below.

These financial information disclosure statements for the gas retailing activities are special purpose financial reports.

**STATUTORY BASE**

The financial information disclosure statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

**MEASUREMENT BASE**

The financial information disclosure statements are prepared on the basis of historical cost and should be read in conjunction with the accounting policies in the Vector Limited's annual report for the year ended 30 June 2009.

The avoidable cost allocation methodology (ACAM) as described in the Electricity Information Disclosure Handbook 31 March 2004 has been adopted, for the allocation of revenues, costs, assets and liabilities between the regulated activities and other activities of the company. Under the Gas (Information Disclosure) Regulation 1997, there is no mandated allocation methodology, thus ACAM as prescribed in the Electricity Information Disclosure Handbook has been applied.

Allocations have been carried out on the following basis:

- Direct allocation of all components of financial statement items which are directly attributable to the activity.
- For any components of financial statement items that are not directly attributable to an activity:
  - By assessing the proportions of those components which are avoidable and non-avoidable; and
  - Allocating those components amongst the activities on the basis of those proportions using an appropriate cost allocator.

The two main allocators used are the number of employees and the book value of property, plant and equipment. Some costs like IT costs and non-system asset depreciation are separately analysed and are allocated using allocators specific to those costs.

In applying the principles of ACAM, activities have been split into two categories – activities potentially subject to limited or no competition and activities that operate in a competitive market. ACAM is intended to show that no more than the standalone costs have been allocated to the activities in potentially non-competitive markets. The 'not directly attributable' costs are initially allocated to the activities potentially subject to limited or no competition, any residual costs i.e. avoided costs are allocated to incremental activities. The gas retailing activities are treated as an incremental activity as it operates in a competitive market.

All financial statement items not allocated to the gas retailing activities, are allocated to other activities within the Vector group. Other activities are not disclosed within these financial information disclosure statements.

**GOING CONCERN**

The financial statements have been prepared on a going concern basis.

**NGC HOLDINGS LIMITED  
GAS RETAILING ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES**

The following specific accounting policies that materially affect the measurement of operating surplus and balance sheet items have been applied consistently to all periods presented in the financial statements.

**A) REVENUE****Sale of goods**

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable. Revenue is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably and there is no continuing management involvement with the goods.

**B) GOODS AND SERVICES TAX (GST)**

The income statement has been prepared so that all components are stated exclusive of GST. All items in the balance sheet are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

**C) RECEIVABLES**

Receivables are carried at estimated realisable value after providing against debts where collection is doubtful.

**D) INCOME TAX**

Income tax expense comprises current and deferred tax.

Income tax assets and liabilities are the expected tax payable or receivable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance date, and any adjustment to tax payable or receivable in respect of previous years. During the financial period, the income tax liability or asset is estimated based on the forecast effective tax rate for that entire financial period.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Movements in deferred tax assets and liabilities are recognised within tax expense in the income statement unless the temporary difference initially arose in equity or the difference resulted from application of ACAM to balance sheet items in which case the movement is then recognised as an adjustment in equity and / or borrowings against the item to which the temporary difference relates.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at balance date.

Deferred tax assets including unutilised tax losses are recognised to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilised. Deferred tax assets are reviewed at balance date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

**E) IDENTIFIABLE INTANGIBLE ASSETS****Software**

Software that is not integral to the functionality of the related hardware is classified as an intangible asset. It is amortised on a straight line basis over its useful life, commencing on the date it is brought for use. Software assets which are integral to the operation of the related hardware are classified as computer equipment within property, plant and equipment. Software intangible assets have a useful life of between 2 and 10 years.

**NGC HOLDINGS LIMITED  
GAS RETAILING ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****F) PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are tangible assets expected to be used during more than one financial period and include spares held for the servicing of other property, plant and equipment that is owned.

The initial cost of purchased property, plant and equipment is the value of the consideration given to acquire the property, plant and equipment and the value of other directly attributable costs, which have been incurred in bringing the property, plant and equipment to the location and condition necessary for the intended service.

The initial cost of self-constructed property, plant and equipment includes the cost of all materials used in construction, direct labour on the project, financing costs that are attributable to the project, costs of ultimately dismantling and removing the items and restoring the site on which they are located (where an obligation exists to do so) and an appropriate proportion of the other directly attributable overheads incurred in bringing the items to working condition for their intended use. Financing costs that would have been avoided if the expenditure on qualifying assets had not been made are capitalised while the construction activities are in progress. Costs cease to be capitalised as soon as the property, plant and equipment is ready for productive use and do not include any costs of abnormal waste.

Uninstalled property, plant and equipment are stated at the lower of cost and estimated recoverable amount. Estimated recoverable amount is the greater of the estimated amount from the future use of the property, plant and equipment and its ultimate disposal, and its fair value less costs to sell.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation and impairment losses.

Subsequent expenditure relating to an item of property, plant and equipment is added to its gross carrying amount when such expenditure can be measured reliably and either increases the future economic benefits beyond its existing service potential, or is necessarily incurred to enable future economic benefits to be obtained, and that expenditure would have been included in the initial cost of the item had the expenditure been incurred at that time. The costs of day-to-day servicing of property, plant and equipment are recognised in the income statement as incurred.

**G) DEPRECIATION**

Depreciation of property, plant and equipment is calculated on a straight line basis so as to expense the cost of the property, plant and equipment, less any expected residual value, to the income statement over its useful economic life.

Depreciation commences when the item of property, plant and equipment is brought into productive use, or when such items become available for use.

**ESTIMATED  
USEFUL LIVES  
YEARS**

Plant, vehicles and equipment

3 – 40 years

**H) LEASED ASSETS****Operating leases**

Payments made under operating leases, where the lessors effectively retain substantially all the risks and benefits of ownership of the leased property, plant and equipment are recognised in the income statement on a straight-line basis over the lease term. Lease incentives received are recognised as an integral part of the total lease expense over the term of the lease. Property, plant and equipment used under operating leases are not recognised in the balance sheet.

**I) PROVISIONS****Employee entitlements**

Employee entitlements to salaries and wages, annual leave, long-term leave and other benefits are recognised when they accrue to employees.

**NGC HOLDINGS LIMITED  
GAS RETAILING ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****I) PROVISIONS (CONTINUED)****Other provisions**

Provisions are estimated by discounting the expected future cash flows at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where a provision is currently expected to be utilised within one year, or where the future actions of a third party could cause the liability to be settled within one year, the provision is not discounted.

The amortisation or unwinding of any discount applied in establishing the net present value of provisions is charged to finance costs in the income statement as the period of discounting diminishes.

Provisions are liabilities which arise where it is considered, as a result of a past event, that a constructive or legal obligation exists to settle items in the foreseeable future. A provision is recognised where the likelihood of a resultant liability is considered more probable than not and the amount required to settle the liability can be reliably estimated. Where the likelihood of a resultant liability is more than remote but insufficient to warrant a provision, such events are disclosed as contingent liabilities.

**J) IMPAIRMENT**

The carrying amounts of the assets are reviewed at balance date to determine whether there is any evidence of impairment.

Where assets are deemed to be impaired, the impairment loss is the amount that the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

**Impairment of receivables**

The carrying amount of the receivables is compared to the recoverable amount which is amortised cost. Amortised cost is estimated as the present value of estimated future cash flows. Long term receivables are discounted to reflect the time value of money. An impairment loss is recognised if the carrying amount of a receivable or grouping of similar receivables exceeds its recoverable amount. Receivables with a short duration are not discounted.

For trade receivables which are not significant on an individual basis, collective impairment is assessed on a portfolio basis based on numbers of days overdue, and taking into account previous experience of doubtful or delayed collection of debts on portfolios with a similar amount of days overdue.

**Impairment of non-financial assets**

The carrying amounts of the non-financial assets, other than inventories and deferred tax assets, are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists then the asset's carrying amount is compared to its recoverable amount to determine the level of impairment if any.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the income statement.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each balance date for any indications that the loss has decreased or no longer exists. An impairment loss may be reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed to the income statement only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, if no impairment loss had been recognised.

**NGC HOLDINGS LIMITED  
GAS RETAILING ACTIVITIES**

**STATEMENT OF ACCOUNTING POLICIES  
FOR THE YEAR ENDED 30 JUNE 2009**

**NEW STANDARDS EARLY-ADOPTED**

Refer to the accounting policies in Vector Limited's annual report for the year ended 30 June 2009 for detailed information.

**APPROVAL OF FINANCIAL STATEMENTS**

The financial statements were approved by the board of directors on 23 November 2009.

**NGC HOLDINGS LIMITED**  
**GAS RETAILING ACTIVITIES**

**NOTES TO THE FINANCIAL STATEMENTS**

# **NGC HOLDINGS LIMITED** **GAS RETAILING ACTIVITIES**

## **NOTES TO THE FINANCIAL STATEMENTS** **FOR THE YEAR ENDED 30 JUNE 2009**

### **4. DEFERRED TAX (continued)**

| <b>2008</b>                                 | <b>PROPERTY,<br/>PLANT AND<br/>EQUIPMENT<br/>\$000</b> | <b>PROVISIONS<br/>AND<br/>ACCRUALS<br/>\$000</b> | <b>TOTAL<br/>\$000</b> |
|---|--|--|------------------------|
| Balance at the beginning of the period      | (56)   | 72   | 16                     |
| Amounts recognised in the income statement: |  |  |                        |
| Relating to current period                  | 33   | 5  | 38                     |
| <b>Balance at the end of the period</b>     | <b>(23)</b>  | <b>77</b>  | <b>54</b>              |
| Deferred tax assets                         | -  | 77   | 77                     |
| Deferred tax liabilities                    | (23)   | -  | (23)                   |
| <b>Net deferred tax (liability) / asset</b> | <b>(23)</b>  | <b>77</b>  | <b>54</b>              |

The tax charge is notional, therefore no actual tax payments are made and as a result there are no imputation credits available to the gas retailing activities.

### **5. NOTIONAL RESERVES**

|   | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|---|-----------------------|-----------------------|
| Balance at the beginning of the period  | 100                   | 100                   |
| Net surplus for current period          | 3,566                 | 7,094                 |
| Notional dividend declared              | (3,566)               | (7,094)               |
| <b>Balance at the end of the period</b> | <b>100</b>            | <b>100</b>            |

A provision has been made for a notional dividend of \$3.6 million (30 June 2008: \$7.1 million) payable for the current year.

### **6. TRADE RECEIVABLES**

|                              | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|------------------------------|-----------------------|-----------------------|
| <b>Current</b>               |                       |                       |
| Trade receivables            | 29,921                | 31,628                |
| Provision for doubtful debts | (100)                 | (638)                 |
| <b>Total</b>                 | <b>29,821</b>         | <b>30,990</b>         |

### **7. PAYABLES AND ACCRUALS**

|   | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|---|-----------------------|-----------------------|
| <b>Current</b>  |                       |                       |
| Trade payables – NGC gas wholesaling activities (related party) | 7,967                 | 9,295                 |
| Other trade payables and creditors                              | 508                   | 333                   |
| Interest payable  | 247                   | -                     |
| <b>Total</b>  | <b>8,722</b>          | <b>9,628</b>          |

| <b>Total</b> | <b>982</b>   | <b>(718)</b>        | <b>264</b>      |

**12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**FOREIGN EXCHANGE RISK**

Transactions are conducted in foreign currencies for the purpose of protecting the NZD value of capital expenditure. The outstanding forward exchange contracts are used to hedge forecasted foreign currency exposure arising out of the capital expenditure program. Hence at balance date no significant exposure to foreign currency risk exists.

**CREDIT RISK**

In the normal course of business, there is exposure to credit risks from energy retailers, and customers. Credit policies are in place, which are used to manage the exposure to credit risks.

There exists some concentration of credit exposures with a few large energy retailers and large energy customers. To minimise this risk, credit evaluations are performed on all energy retailers and large energy customers and requirement of a bond or other form of security where deemed necessary is made.

|                   | <b>2009</b>     | <b>2008</b>     |
|-------------------|-----------------|-----------------|
|                   | <b>CARRYING</b> | <b>CARRYING</b> |
|                   | <b>AMOUNT</b>   | <b>AMOUNT</b>   |

| Trade receivables | 29,821          | 30,990          |

**13. CONTINGENT LIABILITIES**

Claims against the gas retailing activities, where appropriate, have been recognised and disclosed within provisions. No other material contingencies requiring disclosure have been identified (30 June 2008: nil).

**NGC HOLDINGS LIMITED**  
**GAS RETAILING ACTIVITIES**

**NOTES TO THE FINANCIAL STATEMENTS**

FOR THE YEAR ENDED 30 JUNE 2009

**14. RELATED PARTY BORROWINGS**

Borrowings are a notional loan from Vector Limited.

The interest cost on the borrowings has been calculated using a weighted average interest rate of 7.72% (30 June 2008: 8.03%) applicable to the Vector group borrowings.

**15. TRANSACTIONS WITH RELATED PARTIES**

| NATURE OF THE TRANSACTION  | RELATED PARTY               | 2009<br>\$000 | 2008<br>\$000 |
|--|-----------------------------|---------------|---------------|
| Sold gas based on standard terms and conditions.   | Kapuni Energy Joint Venture | -             | 6,126         |
| Sold gas based on standard terms and conditions.   | Vector Kapuni Limited       | 8,667         | -             |
| Sold gas based on standard terms and conditions.   | Kapuni Gas Treatment Plant  | 1,044         | 1,620         |
| Sold gas for use in the compressors and line heaters based on standard terms and conditions.   | Gas Transmission Activities | 3,798         | 3,280         |
| Purchased gas based on actual amounts billed and notional revenue charged to gas retailing activities based on gas wholesales's cost of gas. | Gas Wholesaling Activities  | 199,442       | 249,657       |
| Purchased gas transmission services based on standard terms and conditions.  | Gas Transmission Activities | 29,160        | 32,720        |
| Purchased gas processing services based on notional revenue charged to gas retailing activities.   | Kapuni Gas Treatment Plant  | 6,131         | 8,845         |
| Purchased distribution services based on standard terms and conditions.  | Gas Distribution Activities | 4,198         | 3,780         |
| Purchased metering services based on standard terms and conditions.  | NGC Metering Limited        | 596           | 589           |
| Purchased distribution services based on standard terms and conditions.  | Vector Limited              | 4,506         | 4,721         |
| Loan advance   | Vector Limited              | 17,129        | 3,985         |

(Transmission and distribution services charges are paid to related parties at the time of billing.)

**CERTIFICATION BY AUDITOR IN RELATION TO FINANCIAL  
STATEMENTS**

We have examined the attached special purpose information disclosure statements of NGC Holdings Limited Gas Transmissions (Information Disclosure) Business and dated 23 November 2009 for the purposes of regulation 6 of the Gas (Information Disclosure) Regulation 1997.

We certify that, having made all reasonable enquiry, to the best of our knowledge, those financial statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

## **NGC HOLDINGS LIMITED GAS TRANSMISSION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2009**

#### **ENTITIES REPORTING**

These financial information disclosure statements comprise the gas transmission activities of NGC Holdings Limited and its subsidiaries. The gas transmission activities involve the ownership and supply of pipeline function services for the transmission of gas.

NGC Holdings Limited is a company registered under the Companies Act 1993. NGC Holdings Limited is a wholly owned subsidiary of Vector Limited. NGC Holdings Limited has adopted New Zealand International Financial Reporting Standards, as such these financial information disclosure statements follow the same accounting policies as that of Vector Limited and comply with New Zealand equivalents to IFRS. The accounting policies as they relate to the gas transmission activities are detailed below.

These financial information disclosure statements for the gas transmission activities are special purpose financial reports.

#### **STATUTORY BASE**

The financial information disclosure statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

#### **MEASUREMENT BASE**

The financial information disclosure statements are prepared on the basis of historical cost and should be read in conjunction with the accounting policies in the Vector Limited's annual report for the year ended 30 June 2009.

The avoidable cost allocation methodology (ACAM) as described in the Electricity Information Disclosure Handbook 31 March 2004 has been adopted, for the allocation of revenues, costs, assets and liabilities between the regulated activities and other activities of the company. Under the Gas (Information Disclosure) Regulation 1997, there is no mandated allocation methodology, thus ACAM as prescribed in the Electricity Information Disclosure Handbook has been applied.

Allocations have been carried out on the following basis:

- Direct allocation of all components of financial statement items which are directly attributable to the activity.
- For any components of financial statement items that are not directly attributable to an activity:
  - By assessing the proportions of those components which are avoidable and non-avoidable; and
  - Allocating those components amongst the activities on the basis of those proportions using an appropriate cost allocator.

The two main allocators used are the number of employees and the book value of property, plant and equipment. Some costs like IT costs and non-system asset depreciation are separately analysed and are allocated using allocators specific to those costs.

All financial statement items not allocated to the standalone gas transmission activities are allocated to other activities within the Vector group. Other activities are not disclosed within these financial information disclosure statements.

#### **GOING CONCERN**

The financial statements have been prepared on a going concern basis.

## **NGC HOLDINGS LIMITED GAS TRANSMISSION ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2009**

#### **SIGNIFICANT ACCOUNTING POLICIES**

The following specific accounting policies that materially affect the measurement of operating surplus and balance sheet items have been applied consistently to all periods presented in the financial statements.

#### **A) INCOME RECOGNITION**

Income from the provision of gas transmission services is recognised as services are delivered. Interest income is accounted for as earned. Income from customer contributions is recognised on a percentage of completion basis.

#### **B) GOODS AND SERVICES TAX (GST)**

The income statement has been prepared so that all components are stated exclusive of GST. All items in the balance sheet are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

#### **C) RECEIVABLES**

Receivables are carried at estimated realisable value after providing against debts where collection is doubtful.

#### **D) INVENTORIES**

Inventories are stated at the lower of cost and net realisable value. Cost is determined on a weighted average cost basis.

#### **E) INCOME TAX**

Income tax expense comprises current and deferred tax.

Income tax assets and liabilities are the expected tax payable or receivable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance date, and any adjustment to tax payable or receivable in respect of previous years. During the financial period, the income tax liability or asset is estimated based on the forecast effective tax rate for that entire financial period.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Movements in deferred tax assets and liabilities are recognised within tax expense in the income statement unless the temporary difference initially arose in equity or the difference resulted from application of ACAM to balance sheet items in which case the movement is then recognised as an adjustment in equity and / or borrowings against the item to which the temporary difference relates.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at balance date.

Deferred tax assets including unutilised tax losses are recognised to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilised. Deferred tax assets are reviewed at balance date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

#### **F) PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are tangible assets expected to be used during more than one financial period and include spares held for the servicing of other property, plant and equipment that is owned.

The initial cost of purchased property, plant and equipment is the value of the consideration given to acquire the property, plant and equipment and the value of other directly attributable costs, which have been incurred in bringing the property, plant and equipment to the location and condition necessary for the intended service.

The initial cost of self-constructed property, plant and equipment includes the cost of all materials used in construction, direct labour on the project, financing costs that are attributable to the project, costs of ultimately dismantling and removing the items and restoring the site on which they are located (where an obligation exists to do so) and an appropriate proportion of the other directly attributable overheads incurred in bringing the items to working condition for their intended use. Financing costs that would have been avoided if the expenditure on qualifying assets had not been made are capitalised while the construction activities are in progress. Costs cease to be capitalised as soon as the property, plant and equipment is ready for productive use and do not include any costs of abnormal waste.

**NGC HOLDINGS LIMITED  
GAS TRANSMISSION ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****F) PROPERTY, PLANT AND EQUIPMENT (CONTINUED)**

Uninstalled property, plant and equipment are stated at the lower of cost and estimated recoverable amount. Estimated recoverable amount is the greater of the estimated amount from the future use of the property, plant and equipment and its ultimate disposal, and its fair value less costs to sell.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation and impairment losses.

Subsequent expenditure relating to an item of property, plant and equipment is added to its gross carrying amount when such expenditure can be measured reliably and either increases the future economic benefits beyond its existing service potential, or is necessarily incurred to enable future economic benefits to be obtained, and that expenditure would have been included in the initial cost of the item had the expenditure been incurred at that time. The costs of day-to-day servicing of property, plant and equipment are recognised in the income statement as incurred.

**G) IDENTIFIABLE INTANGIBLE ASSETS****Software**

Software that is not integral to the functionality of the related hardware is classified as an intangible asset. It is amortised on a straight line basis over its useful life, commencing on the date it is brought for use. Software assets which are integral to the operation of the related hardware are classified as computer equipment within property, plant and equipment. Software intangible assets have a useful life of between 2 and 10 years.

**H) DEPRECIATION**

Depreciation of property, plant and equipment other than freehold land is calculated on a straight line basis so as to expense the cost of the property, plant and equipment, less any expected residual value, to the income statement over its useful economic life.

Depreciation commences when the item of property, plant and equipment is brought into productive use, or when such items become available for use.

|  | <b>ESTIMATED<br/>USEFUL LIVES<br/>YEARS</b> |
|--|---|
| Pipelines, compressors and gate stations | 35 – 65                                     |
| Plant, vehicles and equipment            | 3 – 40                                      |
| Buildings                                | 40 – 100                                    |

**I) LEASED ASSETS****Finance leases**

Property, plant and equipment under finance leases, where substantially all the risks and rewards of ownership are assumed by gas transmission activities as lessee, are recognised as non-current assets in the balance sheet. Leased property, plant and equipment are recognised initially at the lower of the present value of the minimum lease payments or their fair value. A corresponding liability is established and each lease payment apportioned between the reduction of the outstanding liability and the finance expense. The finance expense is charged to the income statement in each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Leased property, plant and equipment are depreciated over the shorter of the lease term and the useful life of equivalent owned property, plant and equipment.

**NGC HOLDINGS LIMITED  
GAS TRANSMISSION ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Operating leases**

Payments made under operating leases, where the lessors effectively retain substantially all the risks and benefits of ownership of the leased property, plant and equipment are recognised in the income statement on a straight-line basis over the lease term. Lease incentives received are recognised as an integral part of the total lease expense over the term of the lease. Property, plant and equipment used under operating leases are not recognised in the balance sheet.

**Leasehold improvements**

The cost of improvements to leasehold property are capitalised and depreciated over the unexpired period of the lease or the estimated useful life of the improvements, whichever is the shorter.

**J) PROVISIONS****Employee entitlements**

Employee entitlements to salaries and wages, annual leave, long-term leave and other benefits are recognised when they accrue to employees.

**Other provisions**

Provisions are estimated by discounting the expected future cash flows at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where a provision is currently expected to be utilised within one year, or where the future actions of a third party could cause the liability to be settled within one year, the provision is not discounted.

The amortisation or unwinding of any discount applied in establishing the net present value of provisions is charged to finance costs in the income statement as the period of discounting diminishes.

Provisions are liabilities which arise where it is considered, as a result of a past event, that a constructive or legal obligation exists to settle items in the foreseeable future. A provision is recognised where the likelihood of a resultant liability is considered more probable than not and the amount required to settle the liability can be reliably estimated. Where the likelihood of a resultant liability is more than remote but insufficient to warrant a provision, such events are disclosed as contingent liabilities.

**K) FINANCIAL INSTRUMENTS**

The allocation of debt and equity items is in accordance with the principles and rules of ACAM.

**L) FOREIGN CURRENCY TRANSLATION**

Transactions in foreign currencies are translated to the respective functional currencies at exchange rates at the dates of the transactions unless transactions are hedged by foreign currency derivative instruments. Foreign currency differences arising on translation are recognised in the income statement. At balance date foreign monetary assets and liabilities are translated at the functional currency closing rate, and exchange variations arising from these translations are included in the income statement.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at historic cost are not retranslated at balance date.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined and are not retranslated at balance date.

**M) IMPAIRMENT**

The carrying amounts of the assets are reviewed at balance date to determine whether there is any evidence of impairment.

Where assets are deemed to be impaired, the impairment loss is the amount that the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

**NGC HOLDINGS LIMITED  
GAS TRANSMISSION ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****M) IMPAIRMENT (CONTINUED)****Impairment of receivables**

The carrying amount of the receivables is compared to the recoverable amount which is amortised cost. Amortised cost is estimated as the present value of estimated future cash flows. Long term receivables are discounted to reflect the time value of money. An impairment loss is recognised if the carrying amount of a receivable or grouping of similar receivables exceeds its recoverable amount. Receivables with a short duration are not discounted.

For trade receivables which are not significant on an individual basis, collective impairment is assessed on a portfolio basis based on numbers of days overdue, and taking into account previous experience of doubtful or delayed collection of debts on portfolios with a similar amount of days overdue.

**Impairment of non-financial assets**

The carrying amounts of the non-financial assets, other than inventories and deferred tax assets, are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists then the asset's carrying amount is compared to its recoverable amount to determine the level of impairment if any.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the income statement.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each balance date for any indications that the loss has decreased or no longer exists. An impairment loss may be reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed to the income statement only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, if no impairment loss had been recognised.

**NEW STANDARDS EARLY-ADOPTED**

Refer to the accounting policies in Vector Limited's annual report for the year ended 30 June 2009 for detailed information.

**APPROVAL OF FINANCIAL STATEMENTS**

The financial statements were approved by the board of directors on 23 November 2009.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
 FOR THE YEAR ENDED 30 JUNE 2009

| <b>6. NOTIONAL RESERVES</b>             | <b>2009</b>    | <b>2008</b>    |
|---|----------------|----------------|
|   | <b>\$000</b>   | <b>\$000</b>   |
| Balance at beginning of the period      | 139,822        | 114,247        |
| Operating surplus for the period        | 29,060         | 25,575         |
| Decrease due to debt-equity ratio reset | (26,437)       | -              |
| <b>Balance at end of the period</b>     | <b>142,445</b> | <b>139,822</b> |

Notional reserves is determined by adjusting debt and equity balances such that the debt to equity ratio is consistent with the Vector group. The debt and equity balances have been reset in 2009 to reflect the change in the Vector group's debt to equity ratio, which changed significantly during the year due to the sale of Wellington electricity network and the subsequent restructuring of various financing arrangements.

| <b>7. INTANGIBLE ASSETS</b> |               |                     |                 |

Interest and other internal costs are capitalised to property, plant and equipment while under construction. Interest is capitalised against property, plant and equipment largely at a capitalisation rate of 8% per annum. During the year \$0.1 million (30 June 2008: \$0.1 million) of interest and other costs were capitalised.

**11. RELATED PARTY BORROWINGS**

Borrowings are a notional loan from Vector Limited.

The interest cost on the borrowings has been calculated using a weighted average interest rate of 7.72% (30 June 2008: 8.03%) applicable to the Vector group borrowings.

| <b>Present value of minimum lease payments</b>      | <b>1,414</b>  | <b>1,037</b>  |

Finance leases relate to motor vehicles with varying lease terms.

## **13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

### **FOREIGN EXCHANGE RISK**

Transactions are conducted in foreign currencies for the purpose of protecting the NZD value of capital expenditure. The outstanding forward exchange contracts are used to hedge forecasted foreign currency exposure arising out of the capital expenditure program. Hence at balance date no significant exposure to foreign currency risk exists.

### **CREDIT RISK**

In the normal course of business, there is exposure to credit risks from energy retailers, and customers. Credit policies are in place, which are used to manage the exposure to credit risks.

There exists some concentration of credit exposures with a few large energy retailers and large energy customers. To minimise this risk, credit evaluations are performed on all energy retailers and large energy customers and requirement of a bond or other form of security where deemed necessary is made.

| c (ii) Accounting rate of profit (including current borrowings in working capital)         | 9.38%                        | 9.64%                        | 7.40%                        | -                           |
| <b>2. EFFICIENCY PERFORMANCE MEASURES</b>  |                              |                              |                              |                             |
| a Direct line costs per kilometre <sup>3</sup>   | \$4,366                      | \$3,170                      | \$3,239                      | \$4,810                     |
| b Indirect line costs per gas customer <sup>4</sup>  | \$1,085,429                  | \$1,149,180                  | \$1,119,079                  | \$1,263,156                 |

<sup>1</sup> The financial performance ratios have been prepared under NZ IFRS for 2009, 2008 and 2007 years. The 2007 year is different as compared to the previously disclosed 2007 ratios prepared under pre-IFRS NZ GAAP. Key reasons for the changes under the transition to NZ IFRS are:

- Software assets classified as property, plant and equipment under pre-IFRS NZ GAAP are reclassified as intangible assets under NZ IFRS. This reduces fixed assets which therefore reduces average capital employed.
- Deferred tax is calculated using the balance sheet approach under NZ IFRS. This resulted in an increase in the deferred liability and a corresponding decrease in equity.

<sup>2</sup> Re-disclosed due to restated cash tax.

<sup>3</sup> Direct line costs excludes fuel gas (FG) and unaccounted for gas (UFG).

Direct line costs per kilometre including FG and UFG is \$5,155, \$6,186, \$6,622 and \$7,410 for 2009, 2008, 2007 and 2006 respectively.

<sup>4</sup> Indirect line costs excludes fuel gas (FG) and unaccounted for gas (UFG). Indirect line costs per gas customer including FG & UFG is \$1,210,394, \$1,627,152, \$1,597,242 and \$1,561,903 for 2009, 2008, 2007 and 2006 respectively.

## **NGC HOLDINGS LIMITED GAS WHOLESALING ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

#### **ENTITIES REPORTING**

These financial information disclosure statements comprise the gas wholesaling activities of NGC Holdings Limited and its subsidiaries. The gas wholesaling activities sell gas to persons for the purpose of resupply by those persons (other than those wholesaling activities involving the supply of gas to refuellers).

NGC Holdings Limited is a company registered under the Companies Act 1993. NGC Holdings Limited is a wholly owned subsidiary of Vector Limited. NGC Holdings Limited has adopted New Zealand International Financial Reporting Standards, as such these financial information disclosure statements follow the same accounting policies as that of Vector Limited and comply with New Zealand equivalents to IFRS. The accounting policies as they relate to the gas wholesaling activities are detailed below.

These financial information disclosure statements for the gas wholesaling activities are special purpose financial reports.

#### **STATUTORY BASE**

The financial information disclosure statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

#### **MEASUREMENT BASE**

The financial information disclosure statements are prepared on the basis of historical cost and should be read in conjunction with the accounting policies in the Vector Limited's annual report for the year ended 30 June 2009.

The avoidable cost allocation methodology (ACAM) as described in the Electricity Information Disclosure Handbook 31 March 2004 has been adopted, for the allocation of revenues, costs, assets and liabilities between the regulated activities and other activities of the company. Under the Gas (Information Disclosure) Regulation 1997, there is no mandated allocation methodology, thus ACAM as prescribed in the Electricity Information Disclosure Handbook has been applied.

Allocations have been carried out on the following basis:

- Direct allocation of all components of financial statement items which are directly attributable to the activity.
- For any components of financial statement items that are not directly attributable to an activity:
  - By assessing the proportions of those components which are avoidable and non-avoidable; and
  - Allocating those components amongst the activities on the basis of those proportions using an appropriate cost allocator.

The two main allocators used are the number of employees and the book value of property, plant and equipment. Some costs like IT costs and non-system asset depreciation are separately analysed and are allocated using allocators specific to those costs.

In applying the principles of ACAM, activities have been split into two categories – activities potentially subject to limited or no competition and activities that operate in a competitive market. ACAM is intended to show that no more than the standalone costs have been allocated to the activities in potentially non-competitive markets. The 'not directly attributable' costs are initially allocated to the activities potentially subject to limited or no competition, any residual costs i.e. avoided costs are allocated to incremental activities. The gas wholesaling activities are treated as an incremental activity as it operates in a competitive market.

All financial statement items not allocated to the gas wholesaling activities, are allocated to other activities within the Vector group. Other activities are not disclosed within these financial information disclosure statements.

#### **GOING CONCERN**

The financial statements have been prepared on a going concern basis.

## **NGC HOLDINGS LIMITED GAS WHOLESALING ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

#### **SIGNIFICANT ACCOUNTING POLICIES**

The following specific accounting policies that materially affect the measurement of operating surplus and balance sheet items have been applied consistently to all periods presented in the financial statements.

#### **A) REVENUE**

##### **Sale of goods**

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable. Revenue is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably and there is no continuing management involvement with the goods.

#### **B) GOODS AND SERVICES TAX (GST)**

The income statement has been prepared so that all components are stated exclusive of GST. All items in the balance sheet are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

#### **C) RECEIVABLES**

Receivables are carried at estimated realisable value after providing against debts where collection is doubtful.

#### **D) INCOME TAX**

Income tax expense comprises current and deferred tax.

Income tax assets and liabilities are the expected tax payable or receivable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance date, and any adjustment to tax payable or receivable in respect of previous years. During the financial period, the income tax liability or asset is estimated based on the forecast effective tax rate for that entire financial period.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Movements in deferred tax assets and liabilities are recognised within tax expense in the income statement unless the temporary difference initially arose in equity or the difference resulted from application of ACAM to balance sheet items in which case the movement is then recognised as an adjustment in equity and / or borrowings against the item to which the temporary difference relates.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at balance date.

Deferred tax assets including unutilised tax losses are recognised to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilised. Deferred tax assets are reviewed at balance date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

#### **E) IDENTIFIABLE INTANGIBLE ASSETS**

##### **Software**

Software that is not integral to the functionality of the related hardware is classified as an intangible asset. It is amortised on a straight line basis over its useful life, commencing on the date it is brought for use. Software assets which are integral to the operation of the related hardware are classified as computer equipment within property, plant and equipment. Software intangible assets have a useful life of between 2 and 10 years.

**NGC HOLDINGS LIMITED  
GAS WHOLESALING ACTIVITIES****STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

**SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****F) PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are tangible assets expected to be used during more than one financial period and include spares held for the servicing of other property, plant and equipment that is owned.

The initial cost of purchased property, plant and equipment is the value of the consideration given to acquire the property, plant and equipment and the value of other directly attributable costs, which have been incurred in bringing the property, plant and equipment to the location and condition necessary for the intended service.

The initial cost of self-constructed property, plant and equipment includes the cost of all materials used in construction, direct labour on the project, financing costs that are attributable to the project, costs of ultimately dismantling and removing the items and restoring the site on which they are located (where an obligation exists to do so) and an appropriate proportion of the other directly attributable overheads incurred in bringing the items to working condition for their intended use. Financing costs that would have been avoided if the expenditure on qualifying assets had not been made are capitalised while the construction activities are in progress. Costs cease to be capitalised as soon as the property, plant and equipment is ready for productive use and do not include any costs of abnormal waste.

Uninstalled property, plant and equipment are stated at the lower of cost and estimated recoverable amount. Estimated recoverable amount is the greater of the estimated amount from the future use of the property, plant and equipment and its ultimate disposal, and its fair value less costs to sell.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation and impairment losses.

Subsequent expenditure relating to an item of property, plant and equipment is added to its gross carrying amount when such expenditure can be measured reliably and either increases the future economic benefits beyond its existing service potential, or is necessarily incurred to enable future economic benefits to be obtained, and that expenditure would have been included in the initial cost of the item had the expenditure been incurred at that time. The costs of day-to-day servicing of property, plant and equipment are recognised in the income statement as incurred.

**G) DEPRECIATION**

Depreciation of property, plant and equipment is calculated on a straight line basis so as to expense the cost of the property, plant and equipment, less any expected residual value, to the income statement over its useful economic life.

Depreciation commences when the item of property, plant and equipment is brought into productive use, or when such items become available for use.

**ESTIMATED  
USEFUL LIVES  
YEARS**

Plant, vehicles and equipment

3 - 40 years

**H) LEASED ASSETS****Operating leases**

Payments made under operating leases, where the lessors effectively retain substantially all the risks and benefits of ownership of the leased property, plant and equipment are recognised in the income statement on a straight-line basis over the lease term. Lease incentives received are recognised as an integral part of the total lease expense over the term of the lease. Property, plant and equipment used under operating leases are not recognised in the balance sheet.

## **NGC HOLDINGS LIMITED GAS WHOLESALING ACTIVITIES**

### **STATEMENT OF ACCOUNTING POLICIES**

FOR THE YEAR ENDED 30 JUNE 2009

#### **SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

##### **I) PROVISIONS**

###### **Employee entitlements**

Employee entitlements to salaries and wages, annual leave, long-term leave and other benefits are recognised when they accrue to employees.

###### **Other provisions**

Provisions are estimated by discounting the expected future cash flows at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where a provision is currently expected to be utilised within one year, or where the future actions of a third party could cause the liability to be settled within one year, the provision is not discounted.

The amortisation or unwinding of any discount applied in establishing the net present value of provisions is charged to finance costs in the income statement as the period of discounting diminishes.

Provisions are liabilities which arise where it is considered, as a result of a past event, that a constructive or legal obligation exists to settle items in the foreseeable future. A provision is recognised where the likelihood of a resultant liability is considered more probable than not and the amount required to settle the liability can be reliably estimated. Where the likelihood of a resultant liability is more than remote but insufficient to warrant a provision, such events are disclosed as contingent liabilities.

##### **J) IMPAIRMENT**

The carrying amounts of the assets are reviewed at balance date to determine whether there is any evidence of impairment.

Where assets are deemed to be impaired, the impairment loss is the amount that the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

###### **Impairment of receivables**

The carrying amount of the receivables is compared to the recoverable amount which is amortised cost. Amortised cost is estimated as the present value of estimated future cash flows. Long term receivables are discounted to reflect the time value of money. An impairment loss is recognised if the carrying amount of a receivable or grouping of similar receivables exceeds its recoverable amount. Receivables with a short duration are not discounted.

For trade receivables which are not significant on an individual basis, collective impairment is assessed on a portfolio basis based on numbers of days overdue, and taking into account previous experience of doubtful or delayed collection of debts on portfolios with a similar amount of days overdue.

###### **Impairment of non-financial assets**

The carrying amounts of the non-financial assets, other than inventories and deferred tax assets, are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists then the asset's carrying amount is compared to its recoverable amount to determine the level of impairment if any.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the income statement.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each balance date for any indications that the loss has decreased or no longer exists. An impairment loss may be reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed to the income statement only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, if no impairment loss had been recognised.

# **NGC HOLDINGS LIMITED** **GAS WHOLESALING ACTIVITIES**

## **NOTES TO THE FINANCIAL STATEMENTS** **FOR THE YEAR ENDED 30 JUNE 2009**

### **3. DEFERRED TAX (continued)**

| <b>2008</b>                                 | <b>PROPERTY,<br/>PLANT AND<br/>EQUIPMENT<br/>\$000</b> | <b>PROVISIONS<br/>AND<br/>ACCRUALS<br/>\$000</b> | <b>TOTAL<br/>\$000</b> |
|---|--|--|------------------------|
| Balance at the beginning of the period      | (31)   | 912  | 881                    |
| Relating to current period                  | (5)  | 405  | 400                    |
| Prior period adjustment                     | -  | 64   | 64                     |
| <b>Balance at the end of the period</b>     | <b>(36)</b>  | <b>1,381</b>                                     | <b>1,345</b>           |
| Deferred tax assets                         | -  | 1,381  | 1,381                  |
| Deferred tax liabilities                    | (36)   | -  | (36)                   |
| <b>Net deferred tax (liability) / asset</b> | <b>(36)</b>  | <b>1,381</b>                                     | <b>1,345</b>           |

The tax charge is notional, therefore no actual tax payments are made and as a result there are no imputation credits available to the gas wholesaling activities.

### **4. NOTIONAL RESERVES**

|   | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|---|-----------------------|-----------------------|
| Balance at the beginning of the period  | 100                   | 100                   |
| Net surplus for the period              | 16,511                | 29,418                |
| Notional dividend declared              | (16,511)              | (29,418)              |
| <b>Balance at the end of the period</b> | <b>100</b>            | <b>100</b>            |

A provision has been made for a notional dividend of \$17 million (30 June 2008: \$29 million) payable for the current year.

### **5. RECEIVABLES AND PREPAYMENTS**

|  | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|--|-----------------------|-----------------------|
| <b>Current</b>   |                       |                       |
| Trade receivables  | 2,031                 | 4,647                 |
| Trade receivables - NGC gas retailing activities (related party) | 7,967                 | 9,295                 |
| Prepayments and other receivables                                | 728                   | 2,018                 |
| <b>Total</b>   | <b>10,726</b>         | <b>15,960</b>         |

All trade receivables are expected to be realised therefore no doubtful debts have been provided for.

### **6. PAYABLES AND ACCRUALS**

|                                    | <b>2009<br/>\$000</b> | <b>2008<br/>\$000</b> |
|------------------------------------|-----------------------|-----------------------|
| <b>Current</b>                     |                       |                       |
| Trade payables and other creditors | 18,694                | 21,824                |
| <b>Total</b>                       | <b>18,694</b>         | <b>21,824</b>         |

**11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

**FOREIGN EXCHANGE RISK**

Transactions are conducted in foreign currencies for the purpose of protecting the NZD value of capital expenditure. The outstanding forward exchange contracts are used to hedge forecasted foreign currency exposure arising out of the capital expenditure program. Hence at balance date no significant exposure to foreign currency risk exists.

**CREDIT RISK**

In the normal course of business, there is exposure to credit risks from energy retailers, and customers. Credit policies are in place, which are used to manage the exposure to credit risks.

There exists some concentration of credit exposures with a few large energy customers. To minimise this risk, credit evaluations are performed on large energy customers and requirement of a bond or other form of security where deemed necessary is made.
