- (k) the market provider and clearing house must immediately report to the Commission any discrepancy or shortfall discovered in the participants' funds account;
- (l) the market provider's website contains, in a prominent place, a statement to the effect that:
 - (i) the markets operated by the market provider are intended as a research and educational facility, not as an investment market or a gambling facility, and the market provider has been authorised to act as a futures dealer, and the contracts traded are treated as futures contracts under New Zealand law, in order to provide certainty as to the legal treatment of the contracts;
 - (ii) the Commission's role in authorising futures dealers is limited and does not imply approval or endorsement of the business, trading or solvency of the company concerned; and
 - (iii) the Commission has not approved any documentation of the market provider, or the terms and conditions on which it carries out its business.

Notes to the Financial Statements—Significant Accounting Policies**1. Reporting Entity**

The Community Trust of Otago (“the Parent”) is a charitable trust, domiciled in New Zealand, incorporated in accordance with the provisions of the Community Trusts Act 1999.

Separate parent and consolidated financial statements are presented. The consolidated financial statements for the year ended 31 March 2008 comprise the Parent and its subsidiary Fillmor House Limited (together referred to as the “Group”).

2. Basis of Preparation**(a) Statement of Compliance**

The financial statements have been prepared in accordance with Generally Accepted Accounting Practice in New Zealand (NZ GAAP). They comply with New Zealand equivalents to International Financial Reporting Standards, and its interpretations (NZ IFRS) and other applicable Financial Reporting Standards, as appropriate for public benefit entities. Compliance with NZ IFRS ensures that the financial statements are comply with International Financial Reporting (IFRS). These are the Group’s first financial statements that NZ IFRS 1 has been applied to.

An explanation of how the transition to NZ IFRS has affected the reported financial position, financial performance and cash flows of the Group is provided in Note 26.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements and in preparing an opening NZ IFRS balance sheet at 1 April 2006 for the purposes of the transition to NZ IFRS.

The financial statements have been approved by the trustees on 24 June 2008.

(b) Basis of Measurement

The financial statements have been prepared on the historical cost basis except for the following:

- Derivative financial instruments are measured at fair value.
- Financial instruments at fair value through profit or loss are measured at fair value.
- Investment property is measured at fair value.

The methods used to measure fair values are discussed further in Note 4.

(c) Functional and Presentation Currency

These financial statements are presented in thousands of New Zealand dollars (\$000s), which is the Parent’s functional currency. All financial information presented in New Zealand dollars has been rounded to the nearest thousand.

(d) Use of Estimates and Judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are relate to the valuation of investments are discussed further in Note 4.

3. Significant Accounting Policies**(a) Basis of Consolidation****(i) Subsidiaries**

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

(ii) Transactions eliminated on consolidation

Intra-group balances, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

(b) Foreign Currency**(i) Foreign currency transactions**

Transactions in foreign currencies are translated to New Zealand dollars (the “functional currency”) at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

(c) Financial Instruments**(i) Non-derivative financial instruments**

Non-derivative financial instruments comprise investments in equity and debt securities, trade and other receivables, cash and cash equivalents, and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value, derivative financial instruments are measured as described below.

Cash and cash equivalents comprise cash balances and call deposits.

Instruments at fair value through profit or loss

An instrument is classified as at fair value through profit or loss if it held for trading or is designated as such upon initial recognition. Financial instruments are designated at fair value through profit or loss if the Group manages such investments and makes purchase and sale decisions based on their fair value. Upon initial recognition, attributable transactions costs are recognised in profit or loss when incurred. Subsequent to initial recognition, financial instruments at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

Investments in subsidiaries

Investments in equity securities of subsidiaries, are measured at cost in the separate financial statements of the Parent.

Trade and other receivables

Trade and other receivables are stated at their cost less impairment losses.

Trade and other payables

Trade and other payables are stated at cost.

(ii) Derivative financial instruments

The Group uses derivative financial instruments to hedge its exposure to foreign exchange and interest rate risks arising from investment activities. In accordance with its treasury policy, the Group does not hold or issue derivative financial instruments for trading purposes. However, derivatives that do not qualify for hedge accounting are accounted for as trading instruments.

Derivative financial instruments are recognised initially at fair value and transaction costs are expensed immediately. Subsequent to initial recognition, derivative financial instruments are stated at fair value. The gain or loss on re-measurement to fair value is recognised immediately in profit or loss.

(d) Property, Plant and Equipment**(i) Recognition and measurement**

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

(ii) Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

(iii) Depreciation

Depreciation is recognised in profit or loss on a diminishing value (d.v.) basis over the estimated useful lives of each part of an item of plant and equipment.

The depreciation rates for the current and comparative periods are as follows:

Depreciation methods, useful lives and residual values are reassessed at the reporting date.

Office furniture and equipment	12 – 48% d.v.
--------------------------------	---------------

(e) Investment Property

Investment property is property held either to earn rental income or for capital appreciation or for both. Investment property is measured at fair value with any change therein recognised in profit or loss.

(f) Impairment

The carrying amounts of the Group’s assets are reviewed at each balance date to determine whether there is any indication of impairment

An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

(i) Impairment of debt instruments and receivables

The recoverable amount of the Group’s receivables carried at amortised cost is calculated as the present value of estimated future cashflows, discounted to the original effective interest rate (i.e. the effective interest rate computed at initial recognition of these financial assets). Receivables with a short duration are not discounted.

(ii) Non-financial assets

The carrying amounts of the Group's non-financial assets, other than investment property, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cashflows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(g) Revenue

(i) Investment income

Refer to Note (i) below.

(ii) Rental income

Rental income from investment property is recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

(h) Lease Payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

(i) Finance Income and Expenses

Finance income comprises interest income on funds invested, dividend income, gains on the disposal of available-for-sale financial assets, changes in the fair value of financial assets at fair value through profit or loss, foreign currency gains, and gains on hedging instruments that are recognised in profit or loss. Interest income is recognised as it accrues, using the effective interest method. Dividend income is recognised on the date that the Group's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

Finance expenses comprise interest expense on foreign currency losses, changes in the fair value of financial assets at fair value through profit or loss, impairment losses recognised on financial assets (except for trade receivables), losses on the disposal of available-for-sale financial assets, and losses on hedging instruments that are recognised in profit or loss.

(j) Income Tax Expense

Income tax expense comprises current and deferred tax, income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(k) New Standards Adopted and Interpretations Not Yet Adopted

A number of new interpretations are not yet effective for the year ended 31 March 2008, and have not been applied in preparing these consolidated financial statements:

- NZ IFRS 8 *Operating Segments*. NZ IFRS 8, which becomes mandatory for the Group's 2010 financial statements, is not expected to have any impact on the consolidated financial statements.
- NZ IFRS 1 *Presentation of financial Statements (revised)*. NZ IFRS 1 will become mandatory for the Group's 2010 financial statements. The Group has not yet determined the potential effect of the interpretation.
- NZ IFRS 4 *Insurance Contracts – Amendments*. NZ IFRS 4, which becomes mandatory for the Group's 2010 financial statements, is not expected to have any impact on the consolidated financial statements.
- NZ IAS 23 *Borrowing Costs*. NZ IAS 23 will become mandatory for the Group's 2010 financial statements, and is not expected to have any impact on the consolidated financial statements.
- NZ IFRIC 12 *Service Concession Arrangements*. NZ IFRIC 12 will become mandatory for the Group's 2009 financial statements, and is not expected to have any impact on the consolidated financial statements.

- NZ IFRIC 13 *Customer Loyalty programmes*. NZ IFRIC 13 will become mandatory for the Group's 2009 financial statements, and is not expected to have any impact on the consolidated financial statements.
- NZ IFRIC 14 *The Limit on a defined benefit Asset*. Minimum funding requirements and their interaction. NZ IFRIC 14 will become mandatory for the Group's 2009 financial statements, and is not expected to have any impact on the consolidated financial statements.

4. Determination of Fair Values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. Where applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(a) Investment Property

An external, independent valuation company, having appropriate recognised professional qualifications and recent experience in the location and category of property being valued, values the Group's investment property on an annual basis. The fair values are based on market values, being the estimated amount for which a property could be exchanged on the date of the valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The discounted cashflow technique is also applied as a cross-check of the valuation.

(b) Investments in Equity and Debt Securities

For investments that are actively traded in organised financial markets, fair value is determined by reference to exchange quoted market bid prices at the close of business on the statement of financial position date.

Investments in pooled funds are valued at the unit exit price determined by the fund manager at the close of business on the statement of position date.

(c) Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

(d) Derivatives

The fair value of forward exchange contracts is based on their listed market price, if available. If a listed market price is not available, then fair value is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate (based on government bonds).

The fair value of interest rate swaps is based on broker quotes. Those quotes are tested for reasonableness by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date.

Trust Capital

Trust capital represents the realised value of its original asset, being shares in Trust Bank.

Capital Maintenance Reserve

The capital maintenance reserve represents the additional amount necessary to preserve the real value of the capital allowing for inflation as measured by the Consumers' Price Index (CPI).

Uncommitted Surplus

Uncommitted surplus represents funds not allocated to the capital maintenance reserve and as such form part of the trust fund. Like the capital maintenance reserve, balances in uncommitted surplus are used to provide a stable flow of grants to the community during times of adverse investment earnings.

Capital Management

The trust's policy is to maintain a strong capital base so as to sustain future development of the trust.

The trust is not subject to any externally imposed capital requirements.

The trust's policies in respect of capital management and allocation are reviewed regularly by the trustees.

There have been no material changes in the trust's management of capital during the period.

Risks arising from the financial assets and liabilities are inherent in the nature of the trust's activities and are managed by means of an ongoing process of identification, measurement and monitoring. The trust is exposed to credit risk, liquidity risk, and market risk. Market risk includes risks around foreign currency, interest rates and pricing.

The trust generally manages these risks in accordance with its statement of investment performance objectives (SIPO). The principle investment objectives are:

- to maximise the total amount of donations which can be financed by the investment of the fund over the long term;
- to preserve the real capital of the fund;
- to maintain equity between present and future generations with respect to the amounts available for donations;
- to maintain the highest degree of stability of investment earnings that is possible consistent with the preceding objectives;

Trustees regard risk as the likelihood that the trust fails to achieve these objectives and have adopted a series of strategies to mitigate all risks. The principle strategies include:

- ensuring the fund is well diversified;
- maintaining an appropriate level of liquidity;
- avoiding purely speculative investments;
- retaining an investment consultant for investment advice;
- using only fund managers which are researched and recommended by the investment consultant;
- maintaining adequate reserves;
- regularly reviewing investment performance.

1. Credit Risk

Credit risk represents the risk that a counter-party to a financial asset fails to discharge an obligation which will cause the trust to incur a financial loss. The current exposure at balance date is the fair value of these assets as disclosed in the statement of financial position. Concentrations of risk arise when a number of financial instruments or contracts are entered into with the same counterparty or where a number of counterparties are engaged in similar business activities, geographic regions or similar economic features that would influence their ability to meet their contractual obligations by reason of changes in economic, political or other considerations.

The trust manages credit concentration risks through:

- a diversified and non-correlated basket of investments across traditional and alternative asset classes
- ensuring compliance with the mandate requirements of each fund manager

The credit quality of the trust's New Zealand and global fixed interest portfolios is managed using the Standard and Poors rating categories. In addition, exposure to global bonds is fully hedged against foreign currency movements. The following is an analysis of the trust's fixed interest portfolios, based on information supplied by the fixed interest managers.

2. Liquidity Risk

Liquidity risk is the risk that the trust will encounter difficulties in meeting the obligations associated with its financial liabilities. This risk is managed through the trust's investment in a diversified portfolio of financial assets. This portfolio consists of marketable securities which, under normal conditions are readily convertible to cash. In addition, the trust maintains sufficient cash and cash equivalents to meet normal operating requirements.

The trust's financial liabilities comprise trade and other payables and committed but unpaid donations.

At balance date, the ratio of financial assets to financial liabilities was 56:1 (2007 – 36:1).

3. Market Risk

Market risk is the risk that the fair value of future cash flows from financial assets will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and market prices. Market risk is managed and monitored using sensitivity analysis and minimised by ensuring that all investment activities are undertaken in accordance with established mandate limits and the investment strategies set out in the trust's statement of investment performance objectives.

3.1 Interest Rate Risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair value of financial assets. The trust's investment in global bonds is held in a pooled fund. Movements in interest rates will be reflected in each pooled fund's fair value asset pricing. NZ Bonds are held in segregated accounts. The exposure to movement in the fair value of the trust's bond portfolios is discussed in the commentary on price risk.

The trust's self managed cash and deposit accounts are interest bearing. Any movement in interest rates on these accounts is minimal and is not considered to be material.

3.2 Currency Risk

Currency risk is the risk that the fair value of, or future cash flows from, financial assets will fluctuate due to changes in foreign currency exchange rates.

At balance date, the trust's exposure to currency risk was as follows:

	2008	2007
Foreign currency denominated financial assets	128,513	134,746
Less foreign currency contracts	115,662	120,034
Total unhedged exposure at 31 March	12,851	14,712

3.3 Pricing Risk

Pricing risk is the risk that the fair value of financial assets will increase or decrease as a result of changes in market prices, whether these changes are caused by factors specific to individual stocks or factors affecting all financial assets in the market. Price risks arise from the Trust's investment portfolio (the Fund). As reported in the section on Significant Accounting Policies, the financial assets are valued at fair value as determined by reference to their quoted bid price at the reporting date, wherever this information is available.

Sensitivity to fluctuations in income for the trust's fund arising from market risk are set out in the following tables provided by the trust's investment consultant, Russell Investment Group Limited.

Sensitivity Analysis for the Trust's Portfolio 31 March 2008

Asset Class	Asset Allocation 31 Mar 2008	Long Term Expected Return p.a.	–1 Standard Deviation Return p.a.	1 Standard Deviation Return p.a.
NZ Equities	4.7%	9.2%	–7.8%	26.2%
Global Equities	23.8%	8.7%	–6.2%	23.6%
NZ Fixed Interest	21.9%	6.3%	3.0%	9.6%
Global Bonds	36.0%	6.3%	3.0%	9.6%
NZ Cash	5.7%	5.7%	4.2%	7.2%
CCFs	2.6%	7.8%	–10.2%	25.8%
Hedge Funds	5.4%	8.3%	0.3%	16.3%
Total	100.0%	7.1%	2.2%	12.0%

From this table it can be seen that the long term expected return of the fund is 7.1% per annum and there is approximately a 68% probability that the return in any one year will be within the range of 2.2% to 12.0%. The trust's actual return for the year was 2.8%. Based on the fund's value at 31 March 2008 of \$189.1 million, it translates that the trust's income from the fund would lie within the range of \$4.1 million to \$22.6 million with an expected amount of \$13.4 million. The trust's actual income from the fund was \$4.9 million.

The following table sets out the position for the year to 31 March 2007.

<i>Asset Class</i>	<i>Asset Allocation 31 Mar 2007</i>	<i>Long Term Expected Return p.a.</i>	<i>-1 Standard Deviation Return p.a.</i>	<i>1 Standard Deviation Return p.a.</i>
NZ Equities	5.3%	8.9%	-8.1%	25.9%
Global Equities	27.1%	8.4%	-6.5%	23.3%
NZ Fixed Interest	20.0%	6.0%	2.7%	9.3%
Global Bonds	31.9%	6.0%	2.7%	9.3%
NZ Cash	5.2%	5.4%	3.9%	6.9%
CCFs	5.1%	7.5%	-10.5%	25.5%
Hedge Funds	5.3%	8.0%	0.0%	16.0%
Total	100.0%	7.0%	2.1%	11.9%

For that year, the long term expected return was 7.0% per annum when there was a 68% probability that the return in any one year would be within the range of 2.1% to 11.9%. The actual return was 6.7%. Based on the fund's value at 31 March 2007 of \$195.4 million, it translates that the trust's income for that year would lie within the range of \$4.1 million to \$23.5 million with an expected amount of \$13.8 million. The trust's actual income from the fund for that year was \$11.9 million.

These sensitivity analyses are based on the volatility of each asset class and the fund as a whole, as measured by plus or minus one standard deviation. The overall effect of the trust's diversified portfolio is to reduce volatility and stabilise investment returns over time.
