Prohibited Firearms Buy-Back 2021 Price List

The Arms Amendment Regulations 2020 will come into effect on 1 February 2021 and amend the Arms Regulations 1992. The new regulations enable the buy-back of a small group of newly prohibited firearms and parts covered by changes to the Arms Act 1983 in June 2020, which referred to "specified items" (firearms and pistol carbine conversion kits) and "specified parts" (parts). In order to apply for compensation for eligible items, in most cases, you will need to have handed in your specified items and specified parts prior to close of business on 1 May 2021. Exceptions to this are in place for people who apply for endorsements or permits and have these declined and for people who apply for unique specified item compensation and who have their application declined. The amnesty period, which provides protection from prosecution for continued possession of these items, will continue until 1 August 2021.

Only firearms and parts that meet the definition of "specified items" and "specified parts" and that were lawfully possessed on 24 June 2020 will be eligible for compensation. To receive compensation for an item that required a firearms licence at that time, you will therefore be required to show that you had a valid firearms licence when handing in those items.

All specified parts handed in must be related to, and able to be used on, a specified item, and not able to be used on a non-prohibited firearm, in order to receive compensation. Where it is a specified part that could also be used on a firearm that became prohibited on 12 April 2019, the part will not be compensated for unless the qualifying specified item is also jointly handed in.

If you have specified items or specified parts that are not included in the price list, you may be able to apply for a compensation amount to be fixed through the Unique Specified Item (USI) channel. Information on the USI channel is available on the Police website www.police.govt.nz

The buy-back process will start on 1 February 2021. Key things to note are below:

- Hand in will be at Police stations. We ask people to please make an appointment to hand in their firearms and/or parts by contacting Police on buyback2021@police.govt.nz.
- The application for compensation (apart from an application for an amount to be fixed through the Unique Specified Item channel) will be made when you deliver the specified item or specified part to Police (or in circumstances where Police agree to collect items, the application will be made on collection).
- Applications for a compensation amount to be fixed through the Unique Specified Item channel will be made by submitting an "Application for Compensation, Unique Specified Item" form (available on the Police website).
- When handing in your firearms and parts you will need to:
 - Transport the firearm to Police safely, including in gun bag and with ammunition removed.
 - Ensure before you hand your specified items or specified parts to Police that they are safely cleared (ammunition has been removed).
 - Show your firearms licence. A driver's licence will be accepted if you are only handing in a Pistol Carbine Conversion Kit (PCCK).
 - o Provide your bank account number.

Understanding How the Buy-Back Works for Firearms

The buy-back price for the items in this list reflects:

- Make, model and variant (where applicable)
- Base price The value is as advised by New Zealand firearms experts before the law change was announced (i.e. immediately prior to 12 November 2019).
- Condition of the firearm this is about the condition of the firearm that you are handing in for buy-back: is it new or near-new; used; or in poor condition? The condition of the firearm is important as it reflects what percentage of the value of the base price you may receive as part of the buy-back process. Please see details in the table below.

Pricing for firearms with 0.22 upper receivers that are now prohibited because the lower receiver is centrefire-capable is to be priced as follows:

• Where the firearm has an upper and lower receiver of the same make and model, it will be priced at the same rate as the centrefire variant on the price list used for the 2021 buyback.

- Where the firearm is a hybrid with non-matching upper and lower receivers, the price will be determined by using the make/model of the lower receiver and then pricing the complete firearm at the same rate as a complete centrefire variant of that make and model on the price list used for the 2021 buyback.
- For example, a full firearm with a Bushmaster centrefire lower receiver will be priced as if attached to a corresponding Bushmaster upper, even where the corresponding upper is of a different make and model, including circumstances where the upper is of a lesser value than the centrefire capable lower receiver.

It is for this purpose that some firearms that were prohibited in the April 2019 law changes are included on this price list.

Air pistol carbine conversion kits that are also capable of being used as pistol carbine conversion kits (and therefore fall within the definition of pistol carbine conversion kits):

Will be treated brand agnostically with a single price applied to all. Compensation for higher value air pistol carbine conversion kits should be sought through the USI channel.

Condition of firearm or PCCK	Explanation	Percentage of base price
New or Near- New condition	The firearm is new or in near-new condition, with little to no use. Would be difficult to determine if the firearm has been used before.	95 %
	Main body - In perfect condition, no scratches or visible wearing.	
	Operation - Passes functions test, action is completely smooth with no	
	resistance or impairment. All safety features function.	
	Barrel - no muzzle wear, bore is shiny.	
	Working surfaces - No damage or wear, no pitting, no corrosion.	
	Internal components - No damage or wear, no pitting, no corrosion.	
Used Condition	The firearm is in safe working condition, has superficial wear and tear that does not impact the firearm's safe and comfortable operation. It has been regularly maintained.	70%
	Main body - Minimal wearing/scratches on all surfaces. Some minor corrosion.	
	Operation - Passes functions test, action is somewhat smooth with little	
	resistance or impairment. All safety features function.	
	Barrel - Some muzzle wear, some wearing on the bore.	
	Working surfaces - Some superficial wear, minimal pitting, minimal	
	corrosion.	
	• Internal components - No damage that would impair the function of the	
	firearm, minimal wear, minimal pitting, minimal corrosion.	
Poor condition	The firearm is inoperable or in unsafe working condition. Rust is present on the firearm, components are damaged or missing. Work would be needed to restore the firearm to a safe level of operation. Would normally be sold to a dealer for parts.	25%
	Main body - Metal is deeply pitted. Significant corrosion present. Wood	
	cracked, dented or broken to the extent it will impact the safe and	
	comfortable operation of the firearm.	
	 Operation - Fails function test, safety features do not function. 	
	Barrel - Bore is visibly damaged. Barrel has damage or cracks.	
	Working surfaces – damaged to a degree that impairs safe and comfortable operation.	
	Internal components - Components missing or damaged to such an extent	
	that they significantly impact the safe operation of the firearm.

Accessories and Parts

Accessories that are now prohibited, such as magazines and suppressors, must also be handed in during the amnesty.

Understanding How the Buy-back Works for Parts, Magazines and Accessories:

As with the prohibited firearms, the buy-back price list for parts and accessories reflects:

- Base price the value just prior to 12 November 2019
- Condition of the part or accessory this is about the condition of the part or accessory: is it new or used; or is it in poor condition?

Condition of part/accessory		Percentage of base price
New or Used condition	A part is classified as being 'New or used" if it is in a condition that means that it enables the safe and effective operation of the firearm. This means that there is no structural damage to the part, no significant corrosion and all aspects of the part are functional. The part may show signs of some wear and non-structural damage (e.g. nicks or scratches).	70%
Poor Condition	A part is classified as being 'Poor' if it is in a condition that does not enable the safe and effective operation of the firearm or pistol carbine conversion kit. This can be indicated by structural damage to the body of the part, significant corrosion or aspects of the part failing to function as intended. The part will likely demonstrate significant external wear.	25 %
Key things to look for - new or used or poor:	 Condition of mounting system - The part should smoothly engage into and bind/lock with the firearm, a loose bond or 'jiggling' can indicate "Poor" condition of part. Corrosion around any moving components of the part - If corrosion is present in the joints of the part it could be a sign of "Poor" condition. Ability to function as intended - If a part fails to function as it is intended to or take undue effort on behalf of the operator then it is an indication of the part being in 'poor' condition. Battery housing (if present) - There should be no corrosion of the battery housing. If corrosion is present, then it will interfere with the effective operation of the part. Damage to working surfaces - Deep or significant damage on the working surfaces of a part will impede the safe and comfortable operation of the firearm and are strong indicators of the part being in "poor condition". 	

Items listed in these sections will only be compensated for when:

- That item cannot lawfully be used on a non-prohibited firearm.
- If the item can also be used on a firearm that became prohibited through the 12 April 2019 law change (and was therefore covered in the previous buyback), only those items that relate specifically to a specified item that was lawfully possessed before 25 June 2020 and is also surrendered to Police at the same time will be compensated

for.

In addition, SKS and AR parts in the list relate only to those clearly branded for an AR or SKS firearm (as appropriate).

Other Accessories: this covers <u>only</u> those items that are for specified items (firearms) and <u>cannot</u> be used on a non-prohibited firearm or a firearm that became prohibited on 12 April 2019 unless a specified item is handed in at the same time.

AK/AR/SKS PARTS: this relates only to those parts designed for a specified item (firearm), are clearly branded for an AK/AR/SKS firearm, and cannot be used on a non-prohibited firearm or a firearm that became prohibited on 12 April 2019 unless a specified item is handed in at the same time.

Other Information

Further information about the buy-back process and how you can hand in your firearm/s is available on the Police website. If you have queries regarding whether there are any exemptions to newly prohibited firearms, for example you are a collector, pest controller or a firearms dealer, please also visit www.police.govt.nz for further information.

Police is committed to working with firearms communities so the transition to the new laws is as easy as possible. We

 $thank\ you\ for\ taking\ part\ in\ the\ buy-back\ process$

Acronym Guide

The following guide has been provided to give a cross reference for firearms owners who may be familiar with well-known acronyms of their firearms but not the full names of them. Please refer to this guide when filling in your notification form or when meeting with assessors at the local collection events.

Acronym	Full Name		
ATI	American Tactical Inc		
BRD	Black Rifle Depot		
C.Z	Ceska Zbrojovka		
EAR	Eagle Arms		
FN	Fabrique Nationale (Herstal)		
GBC	Gun & Bell Custom		
H&K	Heckler & Koch		
IBM	International Business Machines		
JP	John Paul (JP Enterprises)		
LMT	Lewis Machine & Tool		
NEA	North Eastern Arms		
NFA	New Frontier Arms		
PWS	Primary Weapon Systems		
SKB	SaKaBa		
SLR	Self Loading Rifle		
TRW	Thompson Ramo & Wooldridge
