

Specified Prescription Medicines for Designated Registered Nurse Prescribers

This notice revokes and replaces the notice published in the [New Zealand Gazette, 23 March 2022, Notice No. 2022-go969](#).

Pursuant to section 105(5A) of the Medicines Act 1981, I, John Whaanga, Acting Director-General of Health, Ministry of Health, hereby declare the following prescription medicines are specified prescription medicines for the purposes of the Medicines (Designated Prescriber – Registered Nurses) Regulations 2016:

Every reference to a medicine in this notice applies whether the medicine is synthetic in origin or is from biological or mineral sources.

Unless specific reference is made otherwise, every reference applies also to medicines that are:

- a. preparations and admixtures containing any proportion of any substance listed in the notice.
- b. salts and esters of any substance listed in the notice.
- c. preparations or extracts of biological materials listed in the notice.
- d. salts or oxides of elements listed in the notice.

Unless specific reference is made otherwise, every reference to a medicine applies:

- i. if the medicine is in an injection or eye preparation, to any concentration of that medicine; and
- ii. if the medicine is not in an injection or eye preparation, only if the concentration of the medicine is greater than 10 milligrams per litre or per kilogram.

Where any reference is modified by a statement of the strength of the medicine, the strength is calculated using the free acid, base, alcohol or element unless specifically stated otherwise.

Acarbose

Aciclovir

Adapalene

Adrenaline

Alfacalcidol

Allopurinol

Amethocaine; ophthalmic use only

Amitriptyline

Amlodipine

Amoxicillin

Aprepitant

Atenolol

Atorvastatin

Atovaquone

Atropine; ophthalmic use only

Azithromycin

Beclomethasone

Bendrofluazide

Benzathine penicillin

Benzympenicillin

Betamethasone

Bezafibrate

Bimatoprost

Bisoprolol

Brimonidine

Brinzolamide

Budesonide
